

Federal Railroad Administration

# South Central Region

The South Central region is home to the nation's 4<sup>th</sup> and 5<sup>th</sup> largest metropolitan areas by population and is also a major freight hub, with multiple Class I railroads transporting freight to and from the ports of Galveston and New Orleans and across the Mexican border.

### Increased Top Speeds

*between Oklahoma City and Fort Worth*

Infrastructure improvements to 15 rail segments will allow passenger trains to travel at higher speeds on the Texas portion of the route, resulting in up to 17 minutes of travel time savings.

### Safer Grade Crossings

*and congestion mitigation in Texas*

The same infrastructure improvements will not only speed rail traffic, but also reduce the risk of dangerous accidents at grade crossings used by trucks and automobiles.

### Planning and Feasibility Studies

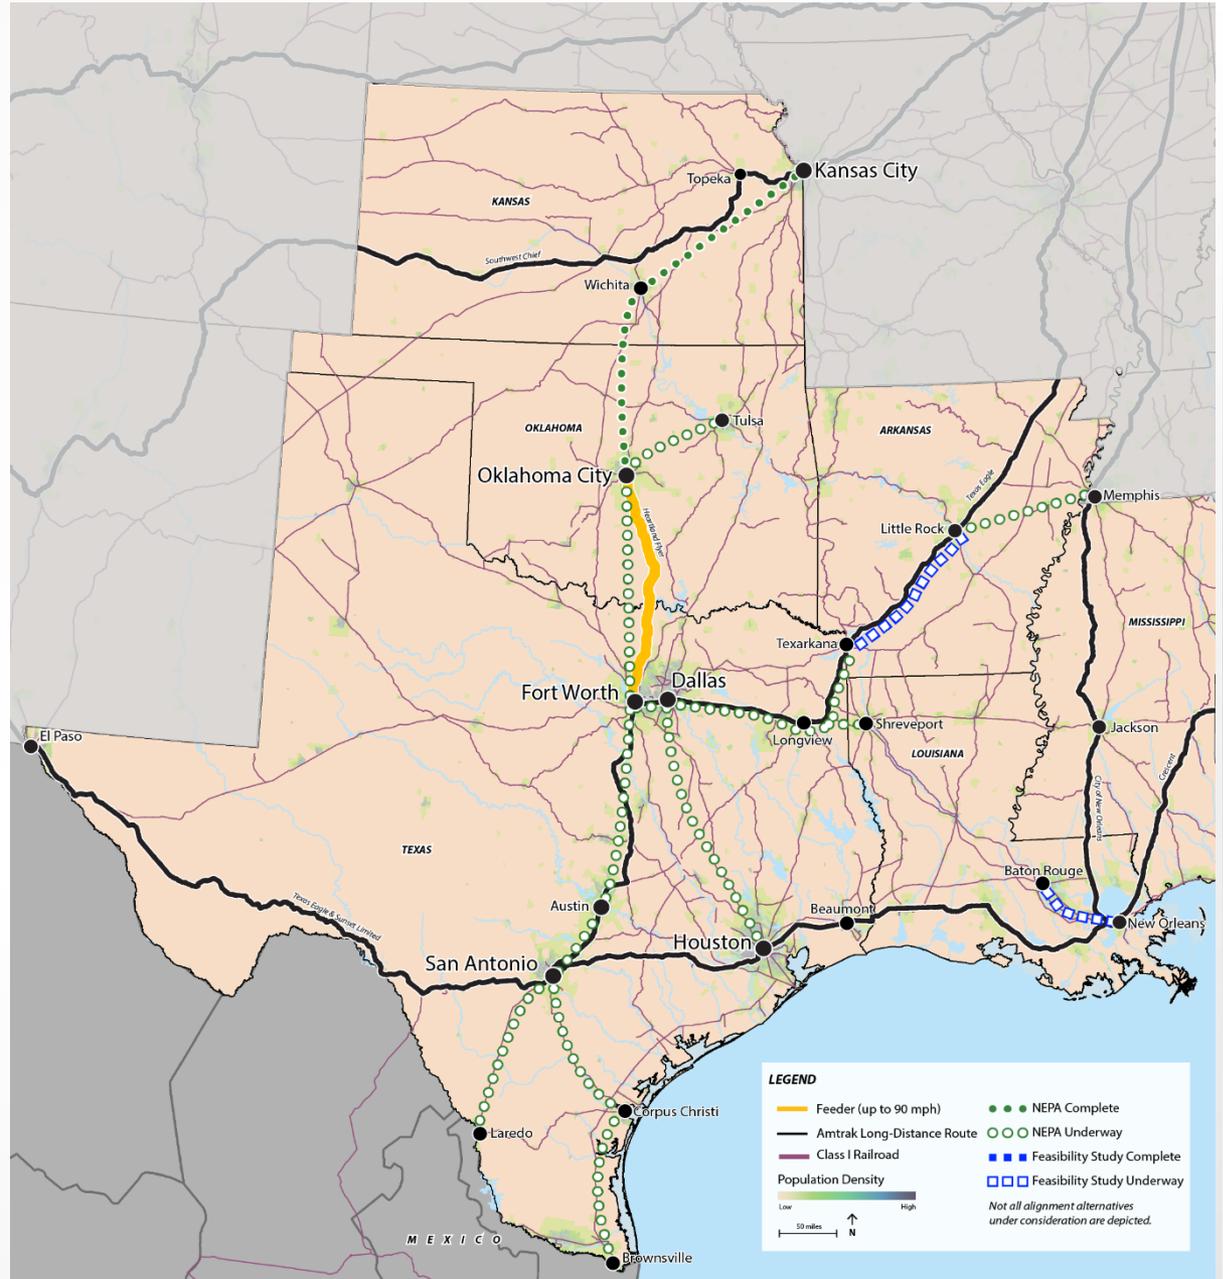

*currently underway for several corridors*

Several corridors are being considered for new or expanded passenger rail service, including a 150 mph route between Dallas and Houston that has strong private sector support.

### 3% Ridership Increase

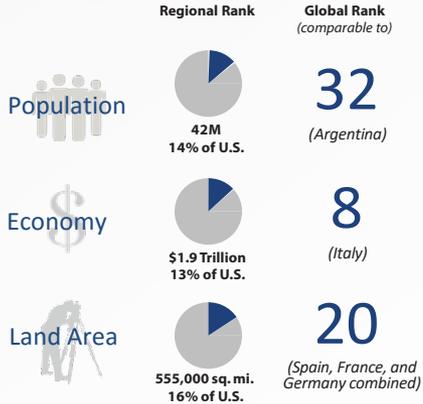

*in the region since 2005*
