<b>REPORT DOCUMENTATION PAGE</b>				Form Approved OMB No. 0704-0188	
Public reporting burden for this collection of information is estimated to average 1 hour per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing this collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to Department of Defense, Washington Headquarters Services, Directorate for Information Operations and Reports (0704-0188), 1215 Jefferson Davis Highway, Suite 1204, Arlington, VA 22202-4302. Respondents should be aware that notwithstanding any other provision of law, no person shall be subject to any penalty for failing to comply with a collection of information if it does not display a currently valid OMB control number. <b>PLEASE DO NOT RETURN YOUR FORM TO THE ABOVE ADDRESS.</b>

<b>14. ABSTRACT</b>  This document contains data for the full Fiscal Year 2024 and updates Appendices A and B from <i>Update on the Methodology for Amtrak Performance Tracking (APT)</i> (DOT-VNTSC-FRA-23-02) published in February 2024. All data within were captured in November 2024 and consist of unaudited figures from APT allocated data available at that time and do not reflect any subsequent adjustments or corrections. The figures are intended only to provide a general snapshot of the relative size of Amtrak's business and may not directly align with other published Amtrak reports, based on differences in reporting methodologies. The data described in the summary paragraphs below and within the appendices should be viewed holistically and do not necessarily account for changes within the Cost Center (CC), Family, or Subfamily structures over time.

# Appendix Executive Summary

The Volpe Center, the Federal Railroad Administration (FRA), and Amtrak have collaborated on three major reports describing Amtrak Performance Tracking (APT), Amtrak's Congressionally mandated cost allocation system. The initial document in 2009 was a Report to Congress and described the initial methodology of the new APT system.<sup>1</sup> A second report followed in 2016 describing revisions to the APT implementation by Amtrak required after it replaced its legacy general ledger system with SAP, a modern enterprise reporting platform.<sup>2</sup> A third report in 2022 updated the methodology description and added additional detail on Amtrak's cost areas.<sup>3</sup>

This document uses Fiscal Year 2024 data and is the third update to the data Appendices A and B from the 2022 report, *Update on the Methodology for Amtrak Performance Tracking (APT) - Volume 1: Main Report*.<sup>4</sup> The prior update used Fiscal Year 2023 data and was published in January 2024.<sup>5</sup>

The data presented within were captured in October 2024 and consist of unaudited figures from APT allocated data available at that time and do not reflect any subsequent adjustments or corrections. The figures are intended only to provide a general snapshot of the relative size of Amtrak's business and may not directly align with other published Amtrak reports, based on differences in reporting methodologies. The data described in the summary paragraphs below and within the appendices should be viewed holistically and do not necessarily account for changes within the cost center, family, or subfamily structures over time.

## Appendix A

In Fiscal Year 2024, Amtrak reported operating and capital expenses at 1,472 cost centers, an increase of 15 from Fiscal Year 2023, in which Amtrak reported expenses across 1,457 cost centers, reflecting the nature of APT as a living system with Amtrak seeking efficiency and alignment with organizational priorities. Those cost centers are listed in Appendix A, by subfamily. The change in cost centers was not distributed equally across the families, with some families increasing while others decreased. The largest net increases were in the Maintenance of Way Family, increasing by six cost centers. Within this family, the Maintenance of Way Support Subfamily (FM\_105), saw the largest increase in cost centers, increasing by seven (with other Maintenance of Way subfamilies increasing or decreasing). The Sales and Marketing Family increased by five cost centers and the Operations-Transportation Family increased by four, and the Maintenance of Equipment Family increased by two. The General and Administrative Family and Police, Environmental & Safety Family, each saw a reduction of one cost center.<sup>6</sup>

In Fiscal Year 2024, Amtrak used 84 subcategories, a net decrease of one from Fiscal Year 2023. Two subcategories used in Fiscal Year 2024 were not present the prior year: Corp Common (FM\_601\_8) and Central Svc Corp Common (FM\_602\_12). Conversely, three subcategories present in Fiscal Year 2023 were no longer used in Fiscal Year 2024 as their component cost centers were either reclassified into another subcategory or show no activity this year. These are Real Estate (FM\_604\_2), Subsidiary – General (FM\_605\_0), and Environmental & Safety – General (FM\_903\_0).

## Appendix B

From Fiscal Year 2023 to Fiscal Year 2024, Amtrak’s total operating and capital expenses increased \$1,654.6 million to \$9,648.8 million (20.7%) (Table ES-1). There were substantial increases across all families from Fiscal Year 2023 to Fiscal Year 2024. The largest changes in terms of absolute increase were in the Maintenance of Way Family, which grew by \$572.4 million (30.2%). Sales and Marketing had the second largest absolute increase at \$513.5 million, while having the largest percentage increase, nearly doubling at 99.1%.

**Table ES-1. Change in Amtrak Family Total Operating and Capital Costs**

Family	Fiscal Year 2024 Expenses (Millions)	Fiscal Year 2024 Change (Millions)	Percentage Change
Maintenance of Way (MoW)	\$2,470.6	\$572.4	30.2%
Maintenance of Equipment (MoE)	\$1,092.6	\$112.6	11.5%
Operations-Transportation (Ops)	\$2,034.7	\$133.0	7.0%

<sup>6</sup> No costs were reported in Fiscal Year 2024 for the Interest Expense Family and no cost centers are shown. The Interest Expense Family captures only infrequent and irregular expenses in cost center CC\_0803 – Interest Expense, prompting its occasional inclusion as an active cost center and family when charges are present. The most recent period with any financial activity was June 2022.

Family	Fiscal Year 2024 Expenses (Millions)	Fiscal Year 2024 Change (Millions)	Percentage Change
Sales and Marketing	\$1,031.5	\$513.5	99.1%
General and Administrative (G&A)	\$2,358.0	\$251.0	11.9%
Capital	\$466.2	\$40.2	9.4%
Police, Environmental & Safety	\$195.2	\$31.9	19.5%
<b>Total</b>	<b>\$9,648.8</b>	<b>\$1,654.6</b>	<b>20.7%</b>

Operating costs in Fiscal Year 2024 increased in total by \$373.1 million to \$5,770.0 million (6.9%) (Table ES-2). Of the seven families, four saw costs increase while three saw costs fall (the Capital Family saw a small increase after not being reported the prior year, but its operating costs still remain near zero). The General & Administrative Family saw the largest increase, both in percentage and absolute terms, increasing \$208.4 million (12.3%). Other families with operating cost increases were the Operations-Transportation family, which increased \$128.3 million (6.9%) and Maintenance of Equipment, which increased \$46.7 million (6.0%).

- Within the General and Administrative family, the bulk of the increase was found in the Centralized Expense subfamily (FM\_801), itself up \$259.5 million, by far the largest single subfamily increase this year.
- Within Operations-Transportation, the largest increase was a \$63.3 million increase in Train Movement – Host RR subfamily (FM\_307), followed by T&E (FM\_302), up \$32.0 million, and OBS (FM\_301), up \$19.3 million.
- Within Maintenance of Equipment, the largest absolute increase was in the MoE Turnaround subfamily (FM\_201), up \$14.7 million (4.8%) and the largest percentage increase was MoE Support (FM\_205), up \$14.2 million (22.3%).

The largest decrease in absolute terms was in the Maintenance of Way Family, with a net drop of \$6.1 million (-0.9%). Most of the fall was confined to the MoW Support Subfamily (FM\_105), accounting for a decrease of \$41.1 million. The MoW Support Subfamily records large credit transactions for benefits transfers to projects and the capital work in progress transfers for capitalized projects. The other eight subfamilies combine for a \$35.1 million increase. The Police, Environmental and Safety Family saw the largest decrease in percentage terms, falling \$2.7 million (-2.2%) with the decrease isolated to the Environmental & Safety Subfamily (FM\_903). The Sales and Marketing Family fell by \$1.6 million (-0.6%).

**Table ES-2. Change in Amtrak Family Operating Costs**

Family	Fiscal Year 2024 Expenses (Millions)	Fiscal Year 2024 Change (Millions)	Percentage Change
Maintenance of Way (MoW)	\$688.1	-\$6.1	-0.9%
Maintenance of Equipment (MoE)	\$821.4	\$46.7	6.0%
Operations-Transportation (Ops)	\$1,982.4	\$128.3	6.9%
Sales and Marketing	\$247.6	-\$1.6	-0.6%

Family	Fiscal Year 2024 Expenses (Millions)	Fiscal Year 2024 Change (Millions)	Percentage Change
General and Administrative (G&A)	\$1,907.3	\$208.4	12.3%
Capital	\$0.02	\$0.0	NA
Police, Environmental & Safety	\$123.1	-\$2.7	-2.2%
<b>Total</b>	<b>\$5,770.0</b>	<b>\$373.1</b>	<b>6.9%</b>

Total capital costs increased \$1,281.5 million from Fiscal Year 2023 to Fiscal Year 2024, a 49.3% increase. Capital expenses rose in all families in Fiscal Year 2024 but were concentrated primarily in the Maintenance of Way Family, up \$578.5 million (48.0%), and the Sales and Marketing Family, up \$515.1 (191.6%). Jointly, these two families account for 85.3% of the year's increase. The family increase was primarily confided to a single subfamily within each: the largest single subfamily increase in capital costs was found in Service Line Mgmt. (FM\_405), up \$516.4 million (202%), followed by MoW Support (FM\_105), up \$483.9 million (48%). The increase in Service Line Mgmt. capital costs are primarily capitalized station rents and the MoW costs are capitalized project costs from completed capital work.

The next largest increase was in the Maintenance of Equipment Family, up \$65.9 million (32.1%). This increase was concentrated almost entirely within the MoE Multiple Subfamily (FM\_205) with \$50.9 million and MoE Back Shop (FM\_207) at \$14.6 million. The Police, Environmental & Safety Family had the second largest percentage increase, up \$34.6 million (92.3%), with the increase split between the Police Subfamily (FM\_901) at \$40.1 million and Emergency Mgmt & Corp Security (FM\_902) at \$23.3 million). Overall, of the 42 active subfamilies, 22 increased in capital costs, 11 decreased, and 9 had zero capital costs. The largest decrease in capital costs was in Centralized Service's (FM\_602), down \$51.4 million (25%).

**Table ES-3. Change in Amtrak Family Capital Costs**

Family	Fiscal Year 2024 Expenses (Millions)	Fiscal Year 2024 Change (Millions)	Percentage Change
Maintenance of Way (MoW)	\$1,782.5	\$578.5	48.0%
Maintenance of Equipment (MoE)	\$271.2	\$65.9	32.1%
Operations-Transportation (Ops)	\$52.2	\$4.6	9.7%
Sales and Marketing	\$783.9	\$515.1	191.6%
General and Administrative (G&A)	\$450.7	\$42.6	10.4%
Capital	\$466.1	\$40.1	9.4%
Police, Environmental & Safety	\$72.1	\$34.6	92.3%
<b>Total</b>	<b>\$3,878.8</b>	<b>\$1,281.5</b>	<b>49.3%</b>

# **Appendix A: Cost Center List by Subfamily**

## A.1 Cost Center List Introduction

This appendix describes the assignment of cost centers to APT's family structure, their shift over time, and the business types to which costs are allocated. While Table A-1 presents a historical view of the number of cost centers, the remaining tables describe the alignment of APT's cost centers within the family structure at the end of Fiscal Year 2024.

## A.2 Cost Center Shifts Over Time

APT is a living system that shifts in response to the current business organization at Amtrak. Accordingly, the number of cost centers within each subfamily may change over time as cost centers are added, retired, or shifted between subfamilies with a change in function. Table A-1 below shows the number of active cost centers assigned to each subfamily for the past eight fiscal years, from Fiscal Years 2017 through 2024, as captured at the conclusion of each fiscal year in the annual appendix updates.

**Table A-1. Number of Cost Centers, by Fiscal Year**

Subfamily	2017	2018	2019	2020	2021	2022	2023	2024
FM_101	11	11	11	11	11	10	12	10

APT is a dynamic system and the nature or function of individual cost centers may change, and cost centers may shift from one subfamily to another, or names may change. In Fiscal Year 2024, Amtrak reported operating and capital expenses at 1,472 cost centers, an increase of 15 from Fiscal Year 2023, in which Amtrak reported expenses across 1,457 cost centers. However, the net change masks the full variation in cost centers. Fiscal Year 2024 included 46 new cost centers with 31 Fiscal Year 2023 cost centers no longer used, resulting in the net increase of 15. Additionally, seven cost centers changed their subcategory assignment and 27 changed their description. Accordingly, the specific cost centers and the business types they allocate costs to are expected to continue to change beyond the Fiscal Year 2024 time period represented here. This Appendix is updated annually to reflect these changes.

## A.3 Description of Amtrak Service Lines

The subfamily tables below present the service lines that each cost center supports. The service lines described here reflect the separate business areas that make up the Amtrak enterprise as of Fiscal Year 2024:

- **National Train Service (NTS):** Amtrak’s primary business of providing intercity passenger train service, consisting of the Northeast Corridor (NEC), State Supported (SS), and Long Distance (LD) service lines.

- **Infrastructure Access:** Provision of access to Amtrak owned facilities, including track, other facilities, and infrastructure services such as yard moves to independently operated railroads. This includes access to both the NEC, owned and operated by Amtrak as well as other Amtrak-owned assets nationwide.
- **Commuter Operations (CMR):** An Ancillary Service, Commuter Operations reflects the provision of commuter rail service by Amtrak on behalf of outside commuter railroad agencies.
- **Reimbursable (REB):** An Ancillary Service, Reimbursable captures maintenance of non-Amtrak owned infrastructure and equipment performed by Amtrak for outside enterprises, mostly commuter railroads and states on a reimbursable cost basis.
- **Commercial (COM):** An Ancillary Service, Commercial reflects Amtrak's management of property and assets for purposes other than for the direct provision of intercity passenger train service (e.g., retail space, parking garages, air rights, etc.).
- **Other – Unallocated:** Not a service line as above, Amtrak groups certain transactions from SAP here that are not allocated to the NTS trains or other service lines. The expenses are mainly depreciation, interest, Amtrak's OIG, and expenses not associated with the current operation such as inactive assets maintained per lease requirements.

## A.4 Fiscal Year 2024 Subcategory Breakdown

Within each subfamily, Amtrak uses one or more subcategories to track subsets of closely related costs. A subcategory is a grouping of similar cost centers within a subfamily that performs a similar subset of functions and activities. For example, the T&E Subfamily (FM\_302) has Subcategories for Crew (FM\_302\_1) and Support (FM\_302\_2). In Fiscal Year 2024, Amtrak used 84 subcategories, a net decrease of one from Fiscal Year 2023. Two subcategories used in Fiscal Year 2024 were not present the prior year: Corp Common (FM\_601\_8) and Central Svc Corp Common (FM\_602\_12). Three subcategories present in Fiscal Year 2023 were no longer used in Fiscal Year 2024, their component cost centers either reclassified into another subcategory or showing no activity this year: Real Estate (FM\_604\_2), Subsidiary – General (FM\_605\_0), and Environmental & Safety – General (FM\_903\_0). Table A-2 offers a view of all subcategories by subfamily.

FM_CAPITAL <sup>7</sup>	Capital	FM_CAPITAL	Capital

<sup>7</sup> The Capital Family is a unique in that it contains a single cost center, CC\_CAPACQ, assigned directly to the Capital Family, FM\_CAPITAL. To best align the costs present at the CC\_CAPACQ in all relevant tables, this report includes FM\_CAPITAL as a subcategory, subfamily, and family.

## A.5 Cost Center Listings by Subfamily

The tables below represent the list of cost centers associated with each APT subfamily at the time the data for this report was gathered from APT in October 2024.<sup>8</sup>

---

<sup>8</sup> The parent account for expenses, AC\_740300\_H2 Expense, was used to determine the relationships and the tables capture where any cost center expenses were allocated to trains within the service line.

## **Appendix B: APT Data Tables**

## B.I APT Data Tables Overview

The data presented in the following tables are derived from APT allocated data for the full Fiscal Year 2024 and are presented in millions of dollars. They are unaudited figures available in the system as of October of 2024 and do not reflect any adjustments or corrections since that time and as such may not be replicable. They are intended only to provide a general snapshot of the relative size of Amtrak's business. The data are both Amtrak's operating and capital expenses<sup>9</sup> (capital work in progress) and reflect the full cost size of Amtrak's businesses of passenger railroad transportation and railroad capital asset production. The data do not include revenues, State or Federal capital contributions, or other balance sheet transactions. Some statistics show large negative values and are the result of allocations to net the internal transfer of overheads or other project expenditures transferred to the asset ledger.

APT is a living system that continually evolves. Some of the codes or descriptions for APT Code Block elements or allocation statistics used at the time of the data collection may have been eliminated, their names modified, or new statistics have been added.

---

<sup>9</sup> The parent account for expenses, AC\_740300\_H2 Expense, was used to pull all expenses, both capital and operating. The Profit Center dimension in APT allows users to sort the data by "Business Views." The data in Appendix B include costs in the operating and capital business views, BV\_OP\_BV and BV\_CAP.

**Table B-1. Fully Allocated Costs by Family, Pre-Audit Fiscal Year 2024 Dollars (Millions)**

Table B-1 provides the allocated costs of each APT Family.

Family Code	Family Name	Operating Costs (Millions)	Percent of Amtrak Fully Allocated Costs	Operating and Capital Costs (Millions)	Percent of Operating and Capital
FM_MOW	Maint of Way (MoW)	\$688.1	11.9%	\$2,470.6	25.6%
FM_MOE	Maint of Equipment (MoE)	\$821.4	14.2%	\$1,092.6	11.3%

**Table B-6. Percent of Family by Statistic, Pre-Audit Fiscal Year 2024 Dollars**

Table B-6 is similar to Table B-5 but is aggregated not by statistic but Family. The values represent each statistic's share of each Family's allocated cost.
