Dear Mr. Faulkner:

This letter responds to the Cincinnati Eastern Railroad (CCET) submission dated May 16, 2025, to the Federal Railroad Administration (FRA) seeking approval of its material modifications to the CCET Engineer Certification Program received by FRA on May 16, 2025. CCET has complied with FRA's procedures for submission and approval of programs as described in Appendix B to 49 CFR part 240. FRA reviewed the railroad's program modifications and determined that the railroad's program modifications conform with the requirements of 49 CFR part 240 for the reasons discussed below.

Your submission package states that no labor organizations represent the railroad's employees.

The program modifications are consistent with the model of the previously approved railroad programs. FRA understands that the modifications will provide more details about the engineer certification process and updated contact information. Additional modifications to the submission also addressed deficiencies with the standard requirements of 49 CFR part 240, appendix B. The improvements enhance qualifications for DLSEs. Standards have been set concerning requalifying over a specific territory. Section Five of your engineer training program has established detailed training standards.

Please continue in your efforts to improve railroad safety on your system.
