Article 1. Parties to Confidential Close Call Reporting System Implementing Memorandum of Understanding (C³RS/IMOU) (Parties)

- A. **Federal Railroad Administration (FRA):** an administration in the Department of Transportation charged with carrying out all railroad safety laws of the United States under 49 United States Code (USC) Section 103 and 49 Code of Federal Regulations (CFR) § 1.89.
- B. **Southeastern Pennsylvania Transportation Authority (SEPTA):** A Common Carrier Transportation Authority whose Regional Rail Division is a railroad that falls under the jurisdiction of the FRA and whose employees are represented by the two (2) unions described herein.
- C. **Brotherhood of Locomotive Engineers and Trainmen (BLET):** the duly recognized collective bargaining representative of the crafts of SEPTA locomotive engineers working within the boundaries of the Confidential Close Call Reporting C³RS Program (Program).
- D. **Transportation Division of SMART (Formerly UTU):** the duly recognized collective bargaining representative of the crafts of SEPTA conductors, assistant conductors, and assistant conductor trainees working within the boundaries of the Program.

Article 2. Purpose

The Parties are voluntarily entering into this C³RS/IMOU with the intent to improve the safety of railroad operations.

The objectives for close call reporting are:

- The accumulation of confidential data on currently unreported or underreported unsafe events;
- Event analysis of reported data by Peer Review Teams (PRT);
- Identification of corrective actions by the Parties to remedy identified safety hazards;
- Provision of assistance by FRA in its safety oversight role; and
- Publication of general trends and statistics by government agencies.

Article 3. Boundaries of the Program

The boundaries of the Program are anywhere SEPTA employees perform activities in support of SEPTA railroad operations.

Article 3.1 Applicability

The C³RS/IMOU will apply to all SEPTA Regional Rail Division employees who are represented by the labor organizations that are described in Article 1 and are signatories to this C³RS/IMOU, including employees in training and/or probationary employees. Employees must submit an accepted C³RS report, subject to conditions in Article 7.1 of this C³RS/IMOU, to have protection from discipline from SEPTA and/or FRA civil enforcement. Additionally, SEPTA will be exempt from FRA civil enforcement under the same terms as these individuals for accepted C³RS reports. This C³RS/IMOU does not alter or modify any Collective Bargaining Agreement.

Article 3.2 Other Covered Employees – Tenant Host Operations

C³RS reports may be accepted from employees when they are operating within the boundaries of this IMOU, or when operating on another railroad that has an approved C³RS IMOU in effect. With respect to tenant/host C³RS operations, the host railroad's IMOU will govern tenant operations.

Article 4. Definitions

Adverse Consequences means the negative impacts that may result from a human error or system failure.

Certification means the qualification and certification of locomotive engineers under 49 CFR Part 240 and the qualification and certification of conductors under 49 CFR Part 242.

Close Call or a Reported Close Call is an opportunity to improve the safety of activities in support of SEPTA railroad operations in a situation or incident that has a potential for more serious *adverse consequences* to railroad safety. The reported close call represents a situation in which an ongoing sequence of events was stopped (except as outlined in Article 6.4) from developing further, preventing the occurrence of potentially serious safety-related consequences. Fatalities and personal injuries do not fall into the category of a close call, and will continue to be reported and handled under the current SEPTA rules and FRA regulations, or any subsequent revisions to SEPTA rules and/or FRA regulations.

Consensus is the voluntary agreement of all representatives.

Corrective Action is an action taken by SEPTA in response to the PRT's recommendations concerning emerging trends and reported safety events.

Discipline is any SEPTA action that would result in a materially adverse employment action like documented verbal conferences, written counseling, written warnings, suspension, termination, demotion, etc.

Employee means a SEPTA employee who is engaged in railroad operations and represented by the labor organizations that are signatories to this C³RS/IMOU.

Event Recorder is any device designed to resist tampering, that monitors and records data on employee activities, equipment operation, track occupancy, record of protection, time, distance, video, and voice recordings, etc.

FRA Safety Inspector means an FRA safety inspector or a state inspector participating in railroad safety investigative and surveillance activities under 49 C.F.R. Part 212, or any other official duly authorized by FRA.

Hazardous material is a commodity designated as a hazardous material by 49 CFR Part 172.

Immediate Co-Worker means a member of the same train crew or work group. The determination, however, is not to be based merely on proximity, but on functionality as well. An engineer, a passenger conductor, and assistant conductors working the same train would be immediate co-workers. A train crew conducting switching operations but separated from each other by distance, cars, etc., so that they are only in radio contact (i.e., not visual contact) are members of the same train crew. If a utility worker is assigned to work with a crew, the utility worker is an immediate Co-Worker.

Need to Know means when government employees and contractors may have access to information only if it is necessary for Program management and programmatic evaluation and analysis. This "need to know" will be administered by the National Aeronautics and Space Administration (NASA) and permission granted by the NASA Program Manager.

Peer Review Team or **PRT** is a problem-solving team consisting of local representatives for the primary stakeholders to this C³RS/IMOU, including FRA, SEPTA, and labor unions (BLET, and SMART). Each primary stakeholder that is a labor union will have at least one primary PRT representative who attends PRT meetings and one secondary PRT representative who serves as a back-up to the primary PRT representative. The PRT may also include a NASA representative.

PRT Support Team is a team of SEPTA-appointed representatives that helps the PRT review and implements corrective actions based upon the analysis of close call reports. Labor union or FRA representatives may participate in the PRT Support Team when requested by SEPTA.

Railroad Operations means the movement of equipment over rails.

Real-Time Observation means a direct visual observance by an FRA Safety Inspector or SEPTA supervisor/manager of a violation of FRA regulations or SEPTA's operating procedures or practices, including visual observances that occur during operational testing performed by SEPTA supervisors or management.

SEPTA means SEPTA's Regional Rail Division, except for where SEPTA is described as a Common Carrier Transportation Authority in in Article 1.B.

SEPTA employees are employees of SEPTA's Regional Rail Division.

Train Accident/Incident Reporting Threshold is the monetary accident reporting threshold defined in 49 CFR § 225.19(c).

Article 5. Confidentiality

NASA shall act as the owner of the data SEPTA employee(s) report under this C³RS/IMOU and shall protect the confidentiality of this information through its own governance.

After all relevant data about a reported close call event, including the C³RS report and all other information collected by NASA that is relevant to the reported event, have been compiled into a unified document, NASA will develop a de-identified document for further analysis by the PRT. NASA will de-identify this record so that the employee(s)'s identity and any third party reference, including anyone mentioned in the original C³RS report, can no longer be determined through direct or indirect means.

NASA shall protect the following information from disclosure when provided in a close call report:

- 1. The employee close call report form and the content of that form;
- 2. The name of the employee who submits a close call report;
- 3. The name of any other employee mentioned in the close call report;
- 4. The name of the railroad involved in the close call report; and
- 5. Information that would make it obvious that only a few (fewer than three), easily-identifiable people could have made the close call report, such as exact location and time of a close call, or description of specific, rarely used equipment models.
- 6. If NASA is unable to protect the confidentiality of the reporter, the report will not be forwarded to the PRT.

The confidentiality of the information collected during this Program will be preserved beyond the cancellation and/or end of this Program.

Article 5.1 Access to Confidential Data

In the interest of providing the best measures for maintaining the confidentiality of the data, all internal NASA program staff will be granted access to confidential internal use data on a "need to know" basis and for the purposes of completing their work assignments. Internal Program staff includes NASA federal employees and NASA agents. For this Program, NASA agents may include NASA contractors assigned to this Program. The PRT assigned to this Program will have access to de-identified reports and PRT work products.

Article 6. Reporting Procedures

When an employee of SEPTA covered by this C³RS/IMOU observes a safety problem or experiences a close call event, he or she should report the problem or event and describe it in detail to NASA. NASA has developed a close call report form that requests information about the date, time, location, contributing factors, actions taken, and potential consequences of an event, along with any other information necessary to fully describe the event or perceived safety problem. NASA has a process for electronic submission or download of report forms at: http://c3rs.arc.nasa.gov/report/electronic.html.

A separate close call report form is required for each safety problem or close call event experienced during a tour of duty. The employee will complete the report form, either paper or electronic, and submit it based on the instructions on the form. SEPTA will make forms available at work locations. NASA will mail a receipt to the employee.

If NASA determines the initial report contains insufficient information to determine acceptance, the report may receive provisional acceptance. Final eligibility for receipt issuance will be determined when the NASA rail safety expert obtains more information from the employee. NASA may call the reporting employee for further information and the reporting employee is encouraged to provide information. If, based on evidence, the close call report is accepted as valid by NASA, a receipt is issued to the reporting employee via United States Postal Service.

Any record of such receipt will not be available in the NASA close calls reporting system. If an employee facing discipline has lost or misplaced the receipt, the reporting employee may request a verification letter from NASA. This letter will be provided whenever possible. However, there is no guarantee that NASA can provide a verification letter, since NASA does not store any identifying information about the employee who submitted the report.

Once accepted, NASA will evaluate and de-identify the close call form. NASA will then provide the de-identified information to the PRT for evaluation.

The reporting of close call events is neither intended to circumvent nor meant to be a substitute for any existing SEPTA safety programs or reporting procedures. Rather, it is intended to be an additional tool for improving safety.

Article 6.1 Criteria for Close Call Report Acceptance

Reports will be accepted for any condition or event that an employee perceives as potentially resulting in adverse consequences to the safety of railroad operations. An employee should report any concern about one's own safety or someone else's safety that involves activities supporting railroad operations.

Each close call report must contain sufficiently detailed information about an event so NASA can evaluate it. An interviewer may call the employee(s) to obtain more information

about the event. If in doubt, the interviewer will err on the side of accepting the report. NASA will conduct the first screening and the PRT the second screening.

The following types of reports shall be rejected during the initial screening process:

- 1. Any train accident/incident that meets the Train Accident/Incident Reporting Threshold;
- Any reported event that caused or is alleged to have caused any injury, illness, or medical treatment of any kind to any person (including passengers) involved in the event;
- 3. Reports unrelated to the safety of activities performed in support of railroad operations;
- 4. Acts of sabotage and other willful violations/acts or criminal offenses, including use of alcohol and prohibited controlled substances; and
- 5. An event resulting in an identifiable release of a hazardous material.

The following types of reports may be rejected during the initial screening process:

- 1. Reports that do not include sufficient information when the reporting employee(s) does not accept a follow-up call when contacted;
- 2. Personal grievances, such as a rejected time slip or perception of unfairness by a supervisor.

Article 6.2 Conditions Under Which a Reporting Employee is Not Protected from Railroad Discipline, Railroad Revocation of Certification, or Other FRA Civil Enforcement

SEPTA employees included in this C³RS/IMOU receive no protection from railroad discipline, railroad revocation of certification, or other FRA civil enforcement when one or more of the following conditions occur:

- 1. The employee's action or lack of action was intended to damage SEPTA or another entity's operations or equipment or to injure other individuals, or intentionally placed others in danger (for example, sabotage);
- 2. The employee's action or lack of action involved a criminal offense;
- 3. The employee's behavior involved alcohol use, substance abuse, or inappropriate use of controlled substances;
- 4. The report is rejected under Article 6.1;
- 5. The event resulted in any type of accident/incident that meets or exceeds the Train Accident/Incident Reporting Threshold;

- 6. The event caused or is alleged to have caused any fatality, injury, illness, or medical treatment of any kind to any person (including passengers) involved in the event;
- 7. The event resulted in an identifiable release of a hazardous material; or
- 8. The event is a Real Time Observation by a SEPTA supervisor/manager or an FRA Safety Inspector, including operational testing conducted by a SEPTA supervisor or management.

FRA will also afford the same protection from civil enforcement action to SEPTA, as that afforded to a SEPTA employee covered by this C³RS/IMOU, for any incident for which an accepted close call report is filed. Likewise, if an employee report falls under one of the exceptions listed in Article 6.2 and the employee is not afforded protection, SEPTA will also not receive protection from FRA enforcement action.

Article 6.3 Time Limits to File Report and Receive Protection from SEPTA Discipline, Railroad Revocation of Certification, or Other FRA Civil Enforcement

To receive protection from SEPTA discipline, revocation of certification, or other FRA civil enforcement, an employee with knowledge of the incident must submit a written (either paper or electronic) close call report to NASA within three business days (Monday – Friday), of the event. For example, an event that occurs at 3:00 a.m. on a Tuesday must be reported by 11:59 p.m. of that Friday. If the event occurs on Saturday at 3:00 a.m. it must be reported by 11:59 p.m. on Wednesday. Saturday and Sunday or Federally observed holidays are not included in the calculation of business days.

Article 6.4 Special Criteria for Known Event Reporting

This article does not modify SEPTA incident investigation or Alcohol and Drug Testing policy, or supersede any non-FRA Federal or State regulatory requirements (e.g., regulatory requirements promulgated by the Occupational Safety and Health Administration (OSHA)). This article does not include or cover events that are part of real time observations by a SEPTA supervisor/manager or FRA Safety Inspector, including operational testing conducted by a SEPTA supervisor or management.

Events below the FRA Train Accident/Incident Reporting Threshold that do not involve a fatality, injury, illness, or medical treatment, but would require managerial notification and/or protection under SEPTA policy or operating rules, shall be considered eligible close call events. Examples of close call events that must be reported immediately to management/supervisor include, but are not limited to: run-through switches, minor derailments, incomplete job briefings, improper roadway worker protection, roadway worker nearly struck by moving train, and on board electronic monitoring device activations. To facilitate analysis of such events, an employee will provide notification of the event to SEPTA management/supervisor (foreman) without undue delay. A C³RS report will be completed and submitted to NASA within the time limits set forth in Article 6.3.

SEPTA agrees it will not initiate any discipline, written warnings, or written counseling for an event reported to and accepted by NASA as a close call.

NASA will provide a receipt for the close call report as proof of an accepted report.

Article 7. Purpose for Protection from Railroad Discipline, Revocation of Certification, or Other FRA Civil Enforcement

The main purpose of this Program is for the Parties to learn more about the safety risks they face. An important element of the Program is the shielding of employee(s) from SEPTA discipline, revocation of certification, or other FRA civil enforcement potentially arising from events reported under this system. An additional concern is the need to also shield SEPTA from FRA civil enforcement potentially arising from events reported under this system.

Confidential close call reporting protects the identity of the person disclosing information. The PRT is able to use the information to learn about systemic problems and to educate all Parties. The reporting of close calls will foster an environment that enables the Parties involved to understand systemic failures and implement improvements.

Article 7.1 Conditions under Which a Reporting Employee(s) is Protected from Railroad Discipline, Revocation of Certification, or Other FRA Civil Enforcement

Except as provided for in Article 6.2, SEPTA employees included in this C³RS/IMOU who report close calls or who are involved in the reported event under Article 6 will be protected from railroad discipline, or revocation of certification provided an appropriate FRA waiver has been granted, or other FRA civil enforcement provided the reports are submitted under Article 6 and Article 6.3.

If an appropriate FRA waiver has been granted, FRA will not require SEPTA to revoke the certification of the employees if the event meets both of the following two conditions:

- 1. The employee's action or lack of action was not intended to cause damage and/or injury to SEPTA operations, equipment, property, or personnel; to any other entity's property, equipment, or personnel; or to a person; and
- 2. The employee reports the close call event within the time limits set forth in Articles 6.3 and the report is accepted as provided in Article 6.1.

Employee protection from SEPTA discipline, revocation of certification, or other FRA civil enforcement requires that the same above two conditions apply.

Employees who file an accepted close call report are protected from railroad discipline, revocation of certification by SEPTA, and other FRA civil enforcement arising from the retrospective discovery of events involving violations of operating practices/departmental

rules and procedures involving the event reported. This includes the retrospective (as opposed to real-time) use or review of event recorder data.

All employees covered by this C³RS/IMOU that are involved in a close call event will be afforded the same protection as long as at least one immediate co-worker filed an accepted close call report.

SEPTA and FRA are prohibited from using any information contained in a close call report to pursue or defend any disciplinary or civil enforcement actions.

All parties to this IMOU understand that this data is also protected and must not be used for any purpose other than PRT analysis and development of corrective actions. Each of the PRT members will be trained on confidentiality and agree not to disclose close call details outside PRT meetings.

Note: If FRA grants the waiver petitions in question, copies of the FRA's decision letters will be attached to this IMOU and incorporated by reference.

Article 7.2 Conditions under Which SEPTA is Protected from FRA Civil Enforcement

FRA will also afford the same protection from civil enforcement action to SEPTA, as that afforded to a SEPTA employee covered by this C³RS/IMOU, for any event for which an accepted close call report is filed. Likewise, if an employee report falls under one of the exceptions listed in Article 6.2 and the employee is not afforded protection, SEPTA will also not receive protection from FRA civil enforcement action.

Article 7.3 Conditions That are Required for Real-Time Observations

When a real-time observation is made by a SEPTA manager or supervisor under Article 6.2 item 8, the observed employee must be informed of the observation as soon as possible, but not to exceed two hours from the time of the observation of event.

An event may also be considered a real-time observation upon notification by an observing FRA Safety Inspector to the observed employee(s) or the railroad as soon as possible after observing the violation of FRA regulations or SEPTA's operating procedures or practices. The FRA Safety Inspector will document the time, date, location, and a description of the observation on a FRA Inspection Report (6180.96 Report). The FRA Safety Inspector will provide a copy of the Inspection Report to the appropriate railroad officer preferably on the same day, but no later than 24 hours after the observation.

Article 8. How Employee(s) Notify SEPTA or FRA of Protection from Railroad Discipline, Revocation of Certification, or Other FRA Civil Enforcement

When SEPTA initiates an investigation of an unsafe event or condition and an employee(s) indicates that the event or condition has been reported under the C³RS/IMOU, the time limits for pursuing discipline will be put in abeyance if necessary, pending a confirmation receipt from NASA.

When a receipt is available for review, the employee must present it to the railroad manager. If the SEPTA manager can determine the receipt applies to the event, the investigation will be closed. If the Parties do not agree that the receipt is applicable to the event, the employee(s) will present a copy of the receipt to the PRT, who will then accept or reject the receipt as proof of an accepted report of the event in question.

If the PRT accepts the receipt, charges and/or assessed discipline, including any revocation of certification, will be dismissed and all lost time will be paid. If the PRT rejects the receipt, the PRT will advise the SEPTA manager and the time limits for initiating disciplinary proceedings may commence. In such cases, no Party may use nor reference the close call report in the subsequent disciplinary proceedings.

Upon receiving notice of FRA civil enforcement for an event covered by an accepted close call report, the employee(s) will present the receipt to the FRA for assistance in resolving the notice consistent with this C³RS/IMOU.

Article 9. Use of Data

All Parties to this C³RS/IMOU agree to use the information they acquire only for positive purposes to improve railroad safety. This could include new or modified training, assessing risk and allocating resources to address those risks, and learning why these close calls are taking place.

Article 10. Reserved

Article 11. Stakeholders

The primary organizations that will be involved in the Program are:

- FRA's Office of Railroad Safety;
- NASA;
- SEPTA;
- BLET, SMART;
- PRT; and
- PRT Support Team.

Article 12. Stakeholders' Responsibilities in Support of the C³RS/IMOU

The rights, roles, and responsibilities set forth in this C³RS/IMOU apply only to Parties, the Parties' employees, and Stakeholders participating in the Program under this C³RS/IMOU.

Article 12.1 FRA's Responsibilities in Support of the C³RS/IMOU

FRA will oversee the scope and quality of the work. Experience gained from other modes has indicated that the willingness of persons to submit a close call report depends to a large degree on preserving the confidentiality of SEPTA, the reporting employee(s), and immediate co-workers named in those reports. FRA will not seek, and NASA will not

release to FRA, any information that might reveal the identity of such persons, organizations, locations or events mentioned in close call reports.

Specific FRA responsibilities include the following activities:

- Fund the Program if Congress appropriates funds for the Program. The duration of the Program is dependent upon continued Congressional funding. As provided in Article 14, any party may terminate their participation in the Program at any time.
- FRA may assign personnel to assist the PRT to analyze and summarize emerging trends and recommend corrective actions.
- Work with NASA to ensure that NASA's responsibilities outlined in Articles 5 and 5.1 are fulfilled.

Article 12.2 NASA Responsibility in Support of the C³RS/IMOU

NASA's responsibility in support of the C³RS/IMOU is to manage the C³RS and protect the confidentiality of the data. FRA will work with NASA to ensure NASA's responsibilities outlined in Article 5 and 5.1 are fulfilled. NASA's responsibility to protect the confidential information as outlined in this C³RS/IMOU will be governed by a separate Interagency Agreement (IA) between FRA and NASA providing for the development of a railroad safety reporting system. The performance of this C³RS/IMOU is contingent upon the finalization and execution of the IA between FRA and NASA.

Article 12.3 SEPTA Responsibilities in Support of the C³RS/IMOU

SEPTA shall not have any access to nor seek any NASA data that might reveal the identity of employee(s) or individuals mentioned in a close call report. By participating in the Program, SEPTA will:

- Commit to the support and use of the C^3RS at all levels of the organization;
- Consult on the high-level implementation plan with all SEPTA's Senior Managers;
- Ensure SEPTA senior management and supervisors cannot preempt their respective representative's decision-making discretion for an event reported;
- Use the information collected from the Program for the purpose of improving safety. SEPTA agrees not to use the information reported for the purpose of disciplining, decertifying, or disqualifying employee(s) except for those circumstances covered in Article 6.1 and 6.2:
- Use the PRT recommended corrective actions to evaluate and implement corrective
 actions in a timely manner as recommended by a consensus of the PRT and the PRT
 Support Team;

- Develop a communications plan for sharing findings with its employee(s) in order to help achieve success in this Program;
- Fund labor representative's participation on the PRT at the rate of one basic day at the current governing rate of the crafts represented per day worked, or shall make whole the labor representative for lost earnings, whichever is greater. When needed, SEPTA will pay for and reimburse travel expenses outside of SEPTA's service area; and
- Travel for PRT members to attend the Annual User Group meeting will be at the discretion of SEPTA.

Article 12.4 Labor Union(s) Responsibilities in Support of the C³RS/IMOU

By participating in the Program, labor unions signatory to this C³RS/IMOU shall have the following responsibilities:

- Commit to and promote use of the Program at all levels of the organization;
- Appoint representatives to participate on the PRT; and
- Participate on the PRT to analyze and summarize emerging trends and recommend corrective actions.

Article 12.5 Peer Review Team's Responsibilities in Support of the C³RS/IMOU

The PRT's primary responsibility will be to accept for review de-identified close call reports from NASA, and to identify and analyze multiple reports in order to:

- Identify and analyze emerging patterns or trends in close calls, relate those to corrective actions taken by SEPTA, and advise and assist with the implementation of corrective actions:
- Create, review, and discuss a summary report comprised of the individual close call reports, emerging trends, identified root causes, and suggested corrective actions; and
- Assess the association between emerging patterns or trends in close calls and relate those to corrective actions taken by SEPTA.

The PRT will function using, but not limited to, the following guidelines:

• PRT representatives will represent their constituency's perspectives when reviewing or forming a comprehensive view of close call events;

- The PRT will develop a handbook for PRT governance and succession planning. The PRT can change the handbook as conditions warrant;
- The PRT will meet on a required basis, after agreeing to a schedule that considers the availability of PRT members. The PRT may adjust the meeting frequency as needed;
- The PRT conducts business only when a quorum is present. A quorum is defined within the PRT handbook;
- The members of the PRT are encouraged to consult with their peers or industry experts for guidance on complex or sensitive matters where more information is desired to make an informed decision. The use of subject matter experts is encouraged;
- The PRT will conduct its own event analysis driven by the NASA report;
- Each representative is empowered to offer possible sources of risk, error recovery mechanisms, and corrective actions. Diverse perspectives are expected and encouraged. The PRT's opinions reflect a collaborative decision-making process among all PRT representatives;
- The PRT makes its decisions using consensus when assigning root causes and proposing corrective actions. It does not require that all members believe that a particular decision is the best one. Instead, all representatives' positions are given a proper hearing and are addressed, and a decision is one that all can accept;
- If there is a dispute concerning the application of this C³RS/IMOU, the Parties to this C³RS/IMOU are encouraged to use interest based problem solving techniques to resolve the matter internally. PRTs may contact the FRA C³RS implementation team for assistance if the matter cannot be resolved internally;
- The PRT will protect the confidentiality of the reporting employee(s). The PRT will not disclose any information that would make it possible to identify the reporting employee(s) mentioned in the close call report to any person or entity. All Parties also agree to protect the confidentiality of any and all data, analysis, findings and recommendations related to this C³RS/IMOU. The confidentiality of this information will survive in perpetuity.

Article 12.6 PRT Support Team Roles and Responsibilities

The PRT Support Team's responsibilities include:

- Support the PRT during implementation of PRT recommendations;
- Provide continuing Program support;
- Evaluate and implement corrective actions the PRT recommends in a timely manner;

- Review PRT decisions and provide feedback to the PRT, parties, and other stakeholders;
- Report corrective actions SEPTA implements to the PRT or report why no action was taken; and
- Report on the measured effectiveness of corrective actions to the PRT.

Article 12.7 Reserved

Article 13. Modifications

Modifications to this C³RS/IMOU may be proposed at any time during the period of performance by any Party, and shall become effective upon written approval by all Parties.

Article 14. Program Duration/Employee(s) Protections

This C³RS/IMOU will be in effect until cancelled as outlined below. Cancellation of participation is subject to the following restrictions:

- Parties to this C³RS/IMOU may cancel their respective participation with a 45 day written notice to all Parties;
- The termination or modification of the Program will not adversely affect anyone who acted in compliance with the terms of the Program in effect at the time of that action; i.e., if the C³RS/IMOU is terminated, all reports and investigations that were in progress will be handled under the provisions of the Program until they are completed. Employee(s) reporting close call events under this Program will remain protected from SEPTA discipline, revocation of certification, or other FRA civil enforcement for reported events,
- Should any party serve the appropriate cancellation notice, all Parties commit to meet within the 45-day period to seek resolution to avoid cancellation; and
- The confidentiality provided under this C³RS/IMOU survives its cancellation.

Article 15. Record Keeping

To ensure compliance, all records and documents relating to this Program, including any documentation from the PRT, shall be kept in a manner prescribed by SEPTA.

Article 16. C³RS/IMOU Signatures

The Parties below approve this Implementing Memorandum of Agreement and the principles of the Confidential Close Call Reporting System.
