NC DWQ Stream Identification Form Version 4.11 Hungry Creek 06-STR-08

Date: 3/7/2016	Project/Site: DC2RVA - Area 06	Latitude: 37.647732
Evaluator: D. Mitchell	County: Henrico County	Longitude: -77.507690
<b>Total Points:</b> $35.5$ Stream is at least intermittent if $\geq 19$ or perennial if $\geq 30^*$	Stream Determination (circle one) Ephemeral Intermitten Perennial	Other e.g. Quad Name:

A. Geomorphology (Subtotal = 16)	Absent	Weak	Moderate	Strong
1 <sup>a.</sup> Continuity of channel bed and bank	0	1	2	3
2. Sinuosity of channel along thalweg	0	(1)	2	3
3. In-channel structure: ex. riffle-pool, step-pool,	0	(1)	2	3
ripple-pool sequence				_
4. Particle size of stream substrate	0	1	2	(3)
5. Active/relict floodplain	0		2	3
6. Depositional bars or benches	0	(1)	2	3
7. Recent alluvial deposits	0	$\bigcirc$	2	3
8. Headcuts	0	<u> </u>	2	3
9. Grade control	0	0.5		1.5
10. Natural valley	0	0.5		1.5
11. Second or greater order channel	No	= 0	Yes	= 3
artificial ditches are not rated; see discussions in manual				
B. Hydrology (Subtotal = 9.5)				
12. Presence of Baseflow	0	1	2	(3)
13. Iron oxidizing bacteria	0	1	2	3
14. Leaf litter	1.5	1	0.5	0
15. Sediment on plants or debris	0	0.5	1	1.5
16. Organic debris lines or piles	0	0.5	1	1.5
17. Soil-based evidence of high water table?	No	= 0	Yes:	= 3
C. Biology (Subtotal = 10 )				
18. Fibrous roots in streambed	(3)	2	1	0
19. Rooted upland plants in streambed	3	2	(1)	0
20. Macrobenthos (note diversity and abundance)	0	1	2	3
21. Aquatic Mollusks	(0)	1	2	3
22. Fish	0	0.5	1	1.5
23. Crayfish	0	0.5	1	1.5
24. Amphibians	0	0.5		1.5
25. Algae	0	0.5	1	1.5
26. Wetland plants in streambed	1	FACW = 0.75;	OBL = 1.5 Other = 0	
*perennial streams may also be identified using other methods.	See p. 35 of manual
