|--|-----|
| Railroad Maintenance of Way Employee Background Survey | 4   |
| Maintenance of Way Employee's Daily Log.               | .11 |

#### **Description of the Survey Data**

The Federal Railroad Administration (FRA) sponsored a study of the work schedules and sleep patterns of railroad maintenance of way (MOW) workers. The purpose of this document is to describe the study's data files that are available at <a href="www.fra.dot.gov">www.fra.dot.gov</a>. A separate technical report describes the study methods and findings in detail (see reference below). The Office of Management and Budget approved this collection of information under OMB control number 2130-0561 on May 14, 2004. Data collection for this study occurred in July 2004.

#### **Survey Methodology**

The study collected data from a random sample of actively working U.S. railroad MOW workers. The study used two survey instruments, a background survey and a daily log. Copies of both instruments are a part of this document. The background survey gathered demographic information, descriptive data for the MOW worker's job type and work schedule, and a self-assessment of overall health. Study participants used the daily log to record sleep and work periods on both regular workdays and planned days off for a 2-week period.

The response rate for the survey was 31 percent. The accompanying files contain data for the 254 usable responses.

#### **Data Files**

Data from each participant's background survey and daily log are available in two files. The background survey data is in one file and the daily log data is in a separate file. A unique participant identification number appears in both files. Each of these data sets is provided in a separate Excel file.

#### Adjustments to the Data

Protecting the identity of the survey participants necessitated some modifications to the original dataset. A few categories of data are reported as ranges rather than as the raw reported data. For example, this is the case with the age data. For others, such as years of experience, top coding was employed to prevent identification of respondents with over 35 years of experience. Comparison of the survey instruments with the data file will reveal where these adjustments were made. The sex of the respondent does not appear in the data because of the extremely small number of women in the sample.

#### Description of the data items in each file

Each Excel file contains two tabs, one with the data and one with a description of each of the data items in that file.

#### Use of the Data

These data files are the property of the FRA. The data is being made available for researchers and others who are interested in the safety and health of the study population and in the relationship between work schedules and fatigue. Use of the data in books, journal articles, dissertations, theses, and other publications (print or electronic) is

authorized provided that the data is cited as "Federal Railroad Administration. (2008). *Data Files: Work schedules and sleep patterns of railroad maintenance of way workers*. Washington, DC: U.S. Department of Transportation.," and that FRA is notified of the publication (ATTN: Thomas G. Raslear, Federal Railroad Administration, Mail Stop 20, 1200 New Jersey Avenue, SE, Washington, DC 20590).

If you have questions, you can contact:

Alex Viale 781-684-8444 aviale@foster-miller.com Sarah Acton 781-684-4281 sacton@foster-miller.com This collection of information is voluntary, and will be used for research purposes only, specifically to study work-related fatigue among railroad employees. Public reporting burden is estimated to average 10 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Please note that an agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control number for this collection is 2130-0561.

FRA F6180.115 (12/03)

## Wolcomo

and thank you for participating in this project. The purpose of this study is to assemble data on both work and sleep patterns of maintenance of way employees. The data that you record will serve as a history of your work and sleep patterns and how you feel throughout the day. The study will examine the relationship between maintenance of way employees' work schedules and their level of alertness/fatigue.

Your participation is appreciated. Please contact us if you have any questions or comments.

| Date//2004  Today is: |

|-----------------------|

# Instructions

This log is divided into 14 sections, one for each day that you will be recording data. Each section contains both a Sleep and Nap Log and a Work Log.

this is a regular workday or a planned day off. Please start with Day 1. It is important that you provide data for divider page, write the date and indicate whether or not Start a new section for each new day. On the section 14 consecutive days.

When recording time, use the 2400 clock system. For example, 4:30 p.m. is 1630.

# Complete the Sleep and Nap Log for every day of the study. Complete the Work Log for those days that you

If for any reason you do not record data at the appointed time, fill out your log as soon as possible to the best of your ability.

Sleep and Nap Log
Make entries on this log upon awakening and at bedtime
every day. In addition, if you took any naps, enter this information in the log.

break and at the end of the workday when you arrive home. Make entries on the work log at the start of your workday when you arrive at your workplace, during your lunch

log only if you were called back to work on a weekend or other day that is a planned day off, or on a regular workday after you left your workplace. If you did not work an unscheduled work period, then leave this section You should use the unscheduled work period section of the blank.

# Study Compensation

Complete the last page of this log book to indicate your preference for the study compensation.
