152-1 I feel that CHSRA should build a robust barrier between the HSR tracks and the U.P. Tracks clear through Fresno to prevent collisions between the UP trains and the HSR trains.

Response to Submission 152 (Loran W. Harding, August 25, 2011)

152-1

Per design requirements, intrusion barrier will be provided where centerline of HSR tracks are at a distance of 46.5 to 73.0 ft from centerline of closest freight train (e.g. UPRR). Where the separation between tracks is larger, intrusion barriers are not required and are not provided. Please see Section 2.4.2 of the Final EIR/EIS for more information. 154-1 I am interested that the bypass in Chowchilla is not the first choice. Again, established corridors will not be followed & farmland greatly impacted.

154-2 The Harris-deYager maintenance yard should also be removed as I understand that all the farmers involved are no longer in favor of this.

Response to Submission 154 (Pam Upton, August 25, 2011)

154-1

See MF-Response-GENERAL-10.

154-2

See MF-Response-GENERAL-15.

As discussed in Section 2.3.2 of the Final EIR/EIS, at the request of the property owner, the Harris-DeJager site has been withdrawn from further consideration.

Concerns:

155-1 1. About market value has decreased. Not worth selling.

155-2 2. Taking up my pasture for my animals & breed & sell (goats, sheep, cows-some).

155-3 3. Vibration to my home & barns,

4. Noise that frightens my animals

155-4 5. How is this going to effect our utilities rates

155-5 6. When to expect these changes.

7. When to expect rail agents to appraise

8. Many Mainly concerned about the money you intend to offer since the economy market housing is so low. Market is to low to sell
