

THE SECRETARY OF TRANSPORTATION  
WASHINGTON, D.C. 20590

April 13, 2005

The Honorable Richard B. Cheney  
President of the Senate  
Washington, DC 20510

Dear Mr. President:

Enclosed for the consideration of Congress and referral to the appropriate committee is a bill entitled the--

Passenger Rail Investment Reform Act.

The purpose of the bill is to undertake a restructuring of intercity passenger rail transportation in the United States that will increase management accountability and encourage response to market forces. I have served as a member of the Amtrak Board of Directors for four years, and everything I have learned during that time tells me that Amtrak cannot survive as a viable mode of transportation without structural reform. I am also convinced that intercity passenger rail service can and will continue to play a valuable role in the U.S. transportation system if such reform is achieved.

As a virtually unchanged creation of the 1960's, Amtrak has not evolved with the rest of the transportation sector. The assumption adopted in the 1970 statute that established Amtrak -- that a single for-profit private entity could succeed in planning and providing nation-wide passenger rail service -- has long since been shown to be unworkable. The losses of several predecessor railroads on passenger service probably foreshadowed this outcome, but over three decades of experience has made it abundantly clear. In those 34 years, the Federal Government has provided \$29 billion in subsidies to Amtrak, with no prospect of an end to increasing subsidy.

My experience with successful Federal-State partnerships in transportation, such as the public transit area, has led me to five key principles for the needed restructuring of intercity passenger rail:

- Create a system driven by sound economics.
- Require that Amtrak transition to a pure operating company.
- Introduce carefully managed competition to provide higher quality rail services at reasonable prices.

THE SECRETARY OF TRANSPORTATION  
WASHINGTON, D.C. 20590

April 13, 2005

The Honorable J. Dennis Hastert  
Speaker of the House of Representatives  
Washington, DC 20515

Dear Mr. Speaker:

Enclosed for the consideration of Congress and referral to the appropriate committee is a bill entitled the--

Passenger Rail Investment Reform Act.

The purpose of the bill is to undertake a restructuring of intercity passenger rail transportation in the United States that will increase management accountability and encourage response to market forces. I have served as a member of the Amtrak Board of Directors for four years, and everything I have learned during that time tells me that Amtrak cannot survive as a viable mode of transportation without structural reform. I am also convinced that intercity passenger rail service can and will continue to play a valuable role in the U.S. transportation system if such reform is achieved.

As a virtually unchanged creation of the 1960's, Amtrak has not evolved with the rest of the transportation sector. The assumption adopted in the 1970 statute that established Amtrak -- that a single for-profit private entity could succeed in planning and providing nation-wide passenger rail service -- has long since been shown to be unworkable. The losses of several predecessor railroads on passenger service probably foreshadowed this outcome, but over three decades of experience has made it abundantly clear. In those 34 years, the Federal Government has provided \$29 billion in subsidies to Amtrak, with no prospect of an end to increasing subsidy.

My experience with successful Federal-State partnerships in transportation, such as the public transit area, has led me to five key principles for the needed restructuring of intercity passenger rail:

- Create a system driven by sound economics.
- Require that Amtrak transition to a pure operating company.
- Introduce carefully managed competition to provide higher quality rail services at reasonable prices.

- Establish a long-term partnership between the states and the Federal Government to support intercity passenger rail service.
- Create an effective public partnership, after a reasonable transition, to manage the capital assets of the Northeast Corridor.

There is ready evidence in the transportation sector that the transition from a purely Federal creation to a shared Federal-State-local responsibility can work and does deliver substantial improvements in service. One instructive example is the transfer of the Alaska Railroad, a federally owned and operated railroad, to the State of Alaska in 1985. More recently, in 1987, the Federal Government entered into a long-term lease of the two federally owned airports in the metropolitan Washington region (Reagan National and Dulles International) to an airport authority created by the Commonwealth of Virginia and the District of Columbia. In both cases, governmental entities with a direct stake in the service accepted planning and management responsibility for these facilities, with subsequent major improvements. A third example, very close to the Amtrak situation, was the Northeast Rail Service Act of 1981, which provided for transfer of Conrail commuter operations in the Northeast Corridor to the states or localities involved, or to an alternative Amtrak operating subsidiary that was not considered a serious competitor at the time. This shift in responsibility also succeeded.

In shaping our proposal, we consulted with the many stakeholders in intercity rail passenger service to identify their concerns, their needs and their basic authorities so that we can develop the outline of a new national intercity rail passenger policy that can have the broadest possible base of support. The closest model for the restructuring proposed in the enclosed bill is the Federal-State-local partnership found in the public transit mode. Under this model, the regional, State, or local entity (public entity) makes the fundamental decisions about what service is justified, undertakes the planning that fits this service into overall passenger transportation patterns in the area, and manages the enterprise to the best advantage. The Federal role is to participate in making capital investments that support high-quality, integrated services in an area, but not to subsidize service that the local entity itself would not subsidize.

The bill consists of three Titles. Title I provides the foundation for Amtrak's future--the basic realignment of Amtrak management and services that would permit a public entity to inherit and enhance existing routes through decisions that it has the ability to develop and implement itself. Specifically, (1) the Board of Directors would be directed to restructure Amtrak to prepare for the transfer of decisions about what service to provide and how to pay for it to public entities; (2) all but a few residual but important legal rights and duties would be shifted into two separate, free-standing corporations (along with associated personnel and assets) that would undertake arms-length contracting with public entities for services starting not later than the third year after enactment; (3) a method would be established to formulate a joint interstate arrangement

among the eight states comprising the Northeast Corridor and the District of Columbia to, under a 99-year lease from the United States, manage all rail operations in the Corridor; (4) an employee severance payment modeled on that provided to Conrail employees in the Northeast Rail Service Act of 1981 would be offered to current Amtrak employees; and (5) a schedule for phased reduction of operating subsidies to Amtrak's 17 long-distance routes would be put in place over the second through fifth years following enactment, to enable states or groups of states to determine whether and how to continue these operations in whole or in part.

Title II addresses the many financial matters Amtrak must deal with to ready itself for transfer of services and equipment and other assets to successor organizations. Specifically, (1) the important Fiscal Year 2005 limits on grants to Amtrak to ensure more accountability would be made permanent for the transition period of continued operations by Amtrak; (2) Amtrak would prepare the necessary financial and engineering plans to address the backlog of capital projects in the Northeast Corridor and elsewhere; (3) Amtrak's common stock would be redeemed or acquired by eminent domain at book value to simplify the corporate structure in advance of transfers; (4) an exchange of assets held by Amtrak and debt held by the United States would occur to place the fee simple title to the Northeast Corridor and other assets in the United States for subsequent lease or transfer to other government entities; (5) unneeded real estate and other facilities would be liquidated during the first three years following enactment; (6) the outstanding debt secured by real estate and rolling stock would be readied for transfer to the entities that accept this property; and (7) necessary operating and other assistance to effectuate transfer would be authorized.

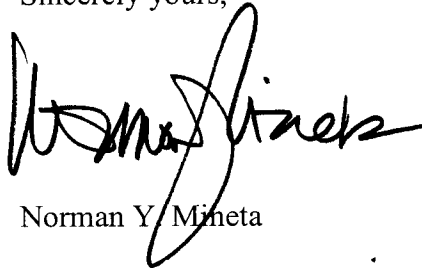

Title III establishes the permanent Federal program of grant assistance for capital projects to be provided to the public entities that become major decision-makers for intercity passenger rail nation-wide, including the Northeast Corridor, but also other regions of our country where infrastructure investments in rail are sought by states. This title is intentionally structured to parallel the existing capital assistance program for public transit (49 U.S.C. 5309). It is quite likely that existing transit properties will accept management responsibility for existing Amtrak services in some metropolitan locales and would benefit from adoption of a familiar, time-proven, grant program mechanism.

Amtrak's financial challenges may prove insurmountable unless we – the Administration and Congress – can agree on how to make intercity rail passenger service work better and within the level of fiscal support that we can afford. This bill is a concrete step in the on-going dialogue over Amtrak's future. Congress has already held hearings in the 108<sup>th</sup> Congress on a nearly identical proposal the Administration transmitted in July 2003. This Administration proposal addresses all of the key issues of intercity passenger rail reform and I trust that, while Congress may choose different

answers to some of those issues, Congress will choose to address all of them, too. Reasonable minds can differ about the best solutions to these issues, but it is clear that better answers than the current system provides are required for all of them. With the expectation that our bill may prompt additional ideas or alternatives in some areas, I look forward to working with Congress and all stakeholders with an interest in passenger rail service in undertaking this difficult but important task. We are ready to work with you to secure passage of a sound bill, and we are prepared to discuss adjustments to our proposal within the framework of the principles expressed earlier in this letter.

The Office of Management and Budget advises that it has no objection, from the standpoint of the Administration's program, to the submission of this legislation, and that its enactment would be consistent with the President's program.

Sincerely yours,

A handwritten signature in black ink, appearing to read "Norman Y. Mineta", with a large, stylized flourish extending from the end of the signature.

Norman Y. Mineta

Enclosures

## **A Bill**

To amend title 49, United States Code, to provide for stable, productive, and efficient passenger rail service in the United States, and for other purposes.

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

### **SECTION 1. SHORT TITLE; TABLE OF CONTENTS.**

(a) SHORT TITLE.--This Act may be cited as the "Passenger Rail Investment Reform Act".

(b) TABLE OF CONTENTS.--The table of contents of this Act is as follows:

Sec. 1. Short title; Table of Contents.

Sec. 2. Purposes; Definitions.

### **TITLE I--NATIONAL PASSENGER RAIL SERVICE RESTRUCTURING**

Sec. 101. Board of Directors of Amtrak.

Sec. 102. Passenger Rail Service Restructuring.

Sec. 103. North East Corridor Compact.

Sec. 104. Assistance to Address Capital Needs.

Sec. 105. Employee Transition Assistance; Authorization.

Sec. 106. Limit on Operating Assistance for Long-Distance Routes.

Sec. 107. Repeal of Obsolete and Executed Provisions of Law; Other.

### **TITLE II--FINANCIAL REFORM**

Sec. 201. Limitations on Availability of Grants.

Sec. 202. Spending Plans for Capital Backlog Reduction.

Sec. 203. Redemption of Common Stock.

Sec. 204. Retirement of Preferred Stock; Transfer of Assets.

Sec. 205. Real Estate and Asset Sales.

Sec. 206. Management and Transfer of Secured Debt.

Sec. 207. Transition Assistance.

### **TITLE III-- GRANTS AND OTHER ASSISTANCE FOR INTERCITY PASSENGER RAIL SERVICE**

Sec. 301. Capital Assistance For Intercity Passenger Rail Service.

Sec. 302. Final Regulations on Applications by States for Corridor Development Grants.

Sec. 303. Authority for Interstate Compacts for Corridor Development.

## **SEC. 2. PURPOSES; DEFINITIONS**

(a) **PURPOSES.**--The purposes of this Act are to--

(1) preserve an intercity passenger rail service system in the United States that is driven by sound economics;

(2) provide a transition from the existing structure for providing such service to a structure that is more aligned with existing and emerging transportation needs;

(3) develop a system that provides high quality passenger rail service at a reasonable cost;

(4) establish a long-term partnership among the states and the Federal government to support intercity passenger rail service; and

(5) create an effective public-private partnership, after a reasonable transition, to manage the capital assets of the Northeast Corridor.

(b) **DEFINITIONS.**--In this Act,

(1) "Year One" means the next Federal fiscal year to begin after the date of enactment of this Act, except that the term means the current Federal fiscal year if the date of enactment of the Act is within 60 days of the first day of the current Federal fiscal year.

(2) "Year Two", "Year Three", "Year Four", "Year Five", and "Year Six" mean, respectively, the Federal fiscal year that follows year one by one, two, three, four, and five years, respectively.

## **TITLE I--NATIONAL PASSENGER RAIL SERVICE RESTRUCTURING**

### **SEC. 101. BOARD OF DIRECTORS OF AMTRAK.**

Section 24302 of title 49, United States Code, is amended to read as follows:

#### **"§ 24302. Board of Directors**

"(a) **MEMBERSHIP.**-- (1) The Transition Board of Directors of Amtrak shall consist of 11 voting members, including--

"(A) the Secretary of Transportation, or an officer of the United States within the Department of Transportation appointed by the President, by and

with the advice and consent of the Senate, and compensated under the Executive Schedule under title 5, United States Code, who is designated by the Secretary (hereafter in this section the 'Secretary's delegate'); and

"(B) 10 other members appointed by the President, by and with the advice and consent of the Senate.

"(2) The President of Amtrak shall serve as an ex officio, nonvoting member of the Board of Directors.

"(b) COMPENSATION.--Each member of the Board of Directors shall not be compensated for service as such member, but shall receive with respect to such service travel expenses, including per diem in lieu of subsistence, in accordance with sections 5702 and 5703 of title 5.

"(c) TERM OF OFFICE.--Members serving un-expired terms on the date of enactment of this section may continue to serve until the earlier of the expiration of their terms or the date on which the restructuring mandated under section 24310 of this title is implemented. Members appointed by the President under subsection (a)(1)(B) shall serve for a term that expires on the date the restructuring mandated in section 24310 of this title is implemented. At the expiration of their terms, members of the Board shall be eligible to serve as members of the boards of successor corporations to Amtrak.

"(d) QUORUM.--At any time after the date of enactment of this section, a majority of the Board members who have been lawfully appointed shall constitute a quorum for purposes of conducting Board meetings and making all necessary decisions regarding the operations, structure, and business affairs of Amtrak.

"(e) TRANSITION COMMITTEE.--(1) The Board of Directors shall form an Asset Transition Committee comprised of the Secretary, or the Secretary's delegate, and two other members, or one other member if two other members are not lawfully appointed.

"(2) In addition to other powers and duties assigned by the Board, the Asset Transition Committee has the duty to ensure that the public interest is served in Board decisions and Amtrak management actions that change the use of or status of (A) the

contractual right of access of Amtrak to rail lines of other railroads; (B) Amtrak secured debt; (C) Northeast Corridor real property and assets; and (D) rolling stock.

"(3) The Board may not take an action with regard to the assets or secured debt specified in paragraph (2), or permit an Amtrak management action with regard to those assets, that is not approved by the Asset Transition Committee.

"(f) MODIFICATION OF BOARD AFTER RESTRUCTURING.--(1) Upon the commencement of operations of the Passenger Rail Service Provider and the Passenger Rail Infrastructure Manager under section 24310 of this title, the Board of Directors of Amtrak shall consist of--

"(A) the Secretary of Transportation;

"(B) the Federal Railroad Administrator or another officer of the United States within the Department of Transportation appointed by the President, by and with the advice and consent of the Senate, and compensated under the Executive Schedule under title 5, United States Code, who is designated by the Secretary; and

"(C) the Federal Transit Administrator or another officer of the United States within the Department of Transportation appointed by the President, by and with the advice and consent of the Senate, and compensated under the Executive Schedule under title 5, United States Code, who is designated by the Secretary.

"(2) Upon the designation of directors by the Secretary under paragraph (1), and with the exception of the Secretary of Transportation, the members of the Transition Board of Directors shall no longer serve as appointees of the President to the Amtrak Board of Directors, but shall instead become members of the Board of Directors of the entities referred to in Federal law as the 'Passenger Rail Service Provider' or the 'Passenger Rail Infrastructure Manager'.

## **SEC. 102. PASSENGER RAIL SERVICE RESTRUCTURING.**

(a) IN GENERAL.--Title 49, United States Code, is amended by inserting the following after section 24309:

"Sec. 24310. Amtrak restructuring mandate

"(a) IN GENERAL.--Within 6 months after Year One begins, and notwithstanding any other provision of this title, the Board of Directors shall prepare a plan to restructure Amtrak management, personnel, assets, operations, and other activities and relationships to conform to the requirements of this section. The Board shall transmit the completed plan to the Committee on Commerce, Science, and Transportation of the Senate, the Committee on Transportation and Infrastructure of the House, and the Committees on Appropriations of the House and Senate.

"(b) MINIMUM REQUIREMENTS.--At a minimum, the restructuring plan required under this section shall provide for the following:

"(1) The filing of appropriate Articles of Incorporation under state law for two business corporations that are entirely independent of Amtrak, hereinafter referred to as the 'Passenger Rail Service Provider' and the 'Passenger Rail Infrastructure Manager' or collectively the 'successor corporations.'

"(2) The division of Amtrak into three functionally independent entities that provide the following:

"(A) A corporation, hereinafter referred to as 'Amtrak', that shall provide overall supervision of Amtrak restructuring and subsequent management of residual responsibilities, including succeeding to the legal rights of the National Railroad Passenger Corporation, and including specifically Amtrak's legal right of access to other railroads, following transfer of rail operations and infrastructure management to the successor corporations established under paragraph (1);

"(B) Passenger rail operating services nationwide, including operation of the reservation centers and ownership and management of existing rolling stock and its maintenance; and

"(C) Passenger rail infrastructure management.

"(3) The assignment of all Amtrak personnel by name to one of the entities specified in paragraph (2), with no loss of pay or benefits, including seniority rights to employment within any entity, except that an employee who elects

employment with the entity specified by paragraph (2)(A) shall become an employee of the corporation, with only such rights regarding pay and benefits as the corporation shall determine;

"(4) The division of accounting, finance, budget, assets, and personnel to provide for the operation and funding of each entity independently.

"(5) A transition schedule that provides for completion of the restructuring not later than the last day of Year One.

"(c) SUCCESSOR CORPORATIONS.--(1) Consistent with the business corporation law of the state of incorporation of the successor corporations specified by subsection (b)(1) of this section, each of the successor corporations shall be qualified to undertake railroad activities of an operational or infrastructure nature on a contractual basis with Amtrak or any other entity;

"(2) The Passenger Rail Service Provider--

"(i) shall have the exclusive right, until the last day of Year Three, to continue to provide the intercity passenger service that is being provided by Amtrak on the date of enactment of the Passenger Rail Investment Reform Act, but after the last day of Year One, may operate such passenger rail service only under a contract; and

"(ii) shall provide interline reservations services to any other provider of intercity passenger rail services on the same basis and rates as services are provided to the operational entities that provide service within Amtrak on the date of enactment.

"(3) The Passenger Rail Infrastructure Manager--

"(i) shall have the exclusive right, until the last day of Year Six, to continue to provide the dispatching, maintenance, and infrastructure services that are being provided by Amtrak on the date of enactment of the Passenger Rail Investment Reform Act, but after the last day of Year One, may provide these services only under a contract; and

"(ii) shall carry out the multi-year infrastructure plan prepared by Amtrak,

to the extent funds are made available.

"(4)(A) The successor corporations are not a department, agency, or instrumentality of the United States Government nor are they Government corporations (as defined in section 103 of title 5)..

"(B) Chapter 105 of this title does not apply to the successor corporations. However, laws and regulations governing safety, employee representation for collective bargaining purposes, the handling of disputes between carriers and employees, employee retirement, annuity, and unemployment systems, and other dealings with employees that apply to a rail carrier providing transportation subject to subchapter I of chapter 105 apply to the successor corporations. The employee retirement, annuity, and unemployment systems that apply to a rail carrier providing transportation subject to subchapter I of chapter 105 apply to the entity specified by subsection (b)(2)(A) of this section.

"(C) Subsections (c) through (l) of section 24301 of this title shall apply to the successor corporations.

"(5) Subject to further action by the Board of Directors, the President of Amtrak on the date of enactment of the Passenger Rail Investment Reform Act shall be offered the position of Chief Executive Officer of the Passenger Rail Service Provider.

"(6) The contractual rights of successor corporations to provide services may not be extended beyond the dates set forth in subsections (c)(2) and (c)(3), as applicable, without competitive bid.

"(7) The Passenger Rail Service Provider shall provide to the Secretary of Transportation not later than 18 months after the enactment of the Passenger Rail Investment Reform Act, recommendations on the feasibility, advantages, and disadvantages of separation of the reservation centers into a free-standing entity that can become an element of an intermodal reservations service.

"(8) The functionally independent entity specified by subsection (b)(2)(A) shall retain all legal rights pertaining to the name 'Amtrak,' and may, at its option, license or otherwise make the name 'Amtrak' commercially available in connection with intercity

passenger rail and related services.

"(d) ROLLING STOCK AND SHOPS.--(1) With respect to any route on which intercity passenger rail service is provided on the date of enactment of the Passenger Rail Investment Reform Act, the Passenger Rail Service Provider shall make available to any replacement operator the legacy equipment that is associated with the service on the route.

"(2) Such equipment and services shall be made available on such terms as Amtrak determines are fair, reasonable, and in the public interest.

"(e) FREIGHT AND COMMUTER OPERATIONS.--(1) Amtrak shall ensure that the implementation of the restructuring prescribed in this section gives due consideration to the needs of freight and commuter rail operations that, as of the effective date of the Passenger Rail Investment Reform Act, operate in the Northeast Corridor on Amtrak right of way.

"(2) Notwithstanding paragraph (1), commuter services headquartered in a State or Commonwealth that is not a member of the North East Corridor Compact after the last day of Year Two, shall pay the fully allocated costs incurred by the successor corporation or any successor entity for access to and use of the Northeast Corridor for such services.

"(3) The right of access by Amtrak to rail lines owned by other carriers is, as of the effective date of the Passenger Rail Investment Reform Act, restricted as follows:

"(A) The terms and conditions for operation of an intercity passenger rail route or frequency to be added after the date of enactment of the Passenger Rail Investment Reform Act shall be determined by negotiation and mutual agreement between the host railroad and the operator of the route or frequency sought to be added, with no preferential right of access.

"(B) If not utilized by Amtrak, Amtrak's right of access to any segment of rail line owned by another rail carrier may be assigned to no more than one intercity passenger rail operator during the term of the assignment, except by agreement among Amtrak, its assignee, and the owner of the rail line.

(b) CONFORMING AMENDMENTS.--(1) The analysis of chapter 243 of title

49, United States Code, is amended by inserting the following after the item relating to section 24309:

"24310. Amtrak restructuring mandate."

(2) Section 24102 (Definitions) of title 49, United States Code, is amended--

(A) by inserting the following after section 24102(5):

"(5a) 'legacy equipment' means the rolling stock required to provide intercity passenger rail service owned or leased by the National Railroad Passenger Corporation on the date of enactment of this chapter."; and

(B) by inserting the following at the end:

"(10) 'Year one' means the next Federal fiscal year to begin after the date of enactment of the Passenger Rail Investment Reform Act, except that the term means the current Federal fiscal year if the date of enactment of the Act is within 60 days of the first day of the current Federal fiscal year.

"(11) 'Year two', 'year three', 'year four', 'year five', and 'year six' mean, respectively, the Federal fiscal year that follows year one by one, two, three, four, and five years, respectively."

### **SEC. 103. NORTH EAST CORRIDOR COMPACT.**

(a) CONSENT TO COMPACT.--(1) The States and District that constitute the Northeast Corridor, as defined in 49 U.S.C. 24102, may enter into an agreement, not in conflict with a law of the United States and titled the "North East Corridor Compact", to provide passenger rail service and to conduct related activities in the Northeast Corridor.

(2) The North East Corridor Compact shall be submitted to Congress for its consent, and it is the sense of Congress that rapid consent to the Compact shall be a priority of Congress.

(b) COMPACT COMMISSION.--(1) There is hereby established a commission to be known as the "North East Corridor Compact Commission (hereinafter referred to in this section as the "Commission"). The Commission shall be composed of five members as follows:

(A) Two members (or their designees), to be selected by the Secretary of

Transportation.

(B) Two members (or their designees), to be selected by agreement of the following government representatives:

(i) The governors of Maryland, Delaware, Pennsylvania, New Jersey, New York, Connecticut, Rhode Island, and Massachusetts.

(ii) The mayor of the District of Columbia.

(C) One member to be selected by the four members selected under paragraphs (1) and (2) of this subsection.

(2) The following applies to the Commission:

(A) Members shall be appointed for the life of the Commission.

(B) A vacancy in the Commission shall be filled in the manner in which the original appointment was made.

(C) Members shall serve without pay but shall receive travel expenses, including per diem in lieu of subsistence, in accordance with sections 5702 and 5703 of title 5, United States Code.

(D) The Chairman of the Commission shall be elected by the members.

(E) The Commission may appoint and fix the pay of such personnel as it considers appropriate.

(F) Upon request of the Commission, the head of any department or agency of the United States may detail, on a reimbursable basis, any of the personnel of that department or agency to the Commission to assist it in carrying out its duties under this section.

(G) Upon the request of the Commission, the Administrator of General Services shall provide to the Commission, on a reimbursable basis, the administrative support services necessary for the Commission to carry out its responsibilities under this section.

(c) FUNCTIONS.--(1) The Commission shall prepare for the consideration of and adoption by participating States, the District of Columbia, and the Secretary of Transportation an interstate compact that provides for the following:

(A) full authority for 99 years to succeed to the responsibilities of the National Railroad Passenger Corporation as operator of the Northeast Corridor, subject to the provisions of a lease from the Department of Transportation;

(B) execution of a lease of the Northeast Corridor from the Department of Transportation, for a period of 99 years, subject to appropriate provisions protecting the lessor's interests, including reversion of all lease interests to the lessor in the event the lessee fails to meet its financial obligations or otherwise assume financial responsibility for Northeast Corridor functions;

(C) responsibility for Corridor maintenance and improvement;

(D) operation of intercity passenger rail service;

(E) arrangements for operation of freight railroad operations and commuter operations; and

(F) assumption of financial responsibility for Northeast Corridor functions.

(G) Authority to make use of the Corridor for non-rail purposes.

(H) Participation by the Department of Transportation, as the non-voting representative of the United States.

(2) The compact terms shall, at a minimum, conform to the requirements of subsections (e) through (i) of this section.

(d) FINAL COMPACT PROPOSAL.--(1) The Commission shall submit a final compact proposal to member states, the District of Columbia, and the Federal Government not later than the last day of Year One.

(2) The Commission shall terminate on the 180th day following the date of transmittal of the final compact proposal under this subsection. All records and papers of the Commission shall thereupon be delivered by the Administrator of General Services for deposit in the National Archives.

(e) GOVERNANCE AND FUNDING REQUIREMENTS FOR COMPACT.--(1) The governance provisions of the compact shall provide a mechanism to ensure voting representation for the States, Commonwealths, and District that comprise the Northeast

Corridor, and non-voting representation for the Secretary of Transportation as an ex officio member participating in all Compact affairs.

(2) The provisions of the compact shall establish the financial obligations of each compact member and shall provide for its management of rail services in the Corridors.

(f) EMPLOYEE INTEREST REQUIREMENTS FOR COMPACT.--The employee provisions of the compact shall, at a minimum, provide the following with regard to employees in the Northeast Corridor if the Compact chooses to replace the successor corporations for operation and maintenance of the physical plant or operation of passenger trains, or both:

(1) Payment of any labor protection payments owed and not paid by the successor corporations established under 49 U.S.C. 24310(b).

(2) In the case of an employee who is employed by the National Railroad Passenger Corporation on the date of enactment of the Passenger Rail Investment Reform Act and who accepts employment by a successor corporation, a right of first refusal to accept a substantially similar position with the replacement operator when the successor corporation is replaced.

(g) FEDERAL INTEREST REQUIREMENTS FOR COMPACT.--The provisions of the Compact shall hold the United States Government harmless as to the actions of the Compact under the lease of rights to the Northeast Corridor by the United States Government.

(h) COMPACT BORROWING AUTHORITY.--(1) The borrowing authority provisions of the compact may authorize the compact to issue bonds or other debt instruments from time to time in its discretion, for purposes that include paying any part of the cost of rail service improvements, construction, and rehabilitation and the acquisition of real and personal property, including operating equipment, except that debt issued by the compact may be secured only by revenues to the compact and may not be a debt of the member States or of the Federal Government.

(2) The debt authorized by this subsection shall under no circumstances be backed by the full faith and credit of the United States, and a grant made under the authority of

this Act or under the authority of Part C of Subtitle V of title 49, United States Code, shall include an express acknowledgement by the grantee that the debt does not constitute an obligation of the United States.

(i) ADOPTION OF COMPACT; TURNOVER.--(1) The members shall adopt a final compact agreement not later than the last day of Year Two, and the compact shall thereafter assume responsibility for all Corridor operations from the successor corporations on a date that is not later than 8 months following adoption of the compact, which date shall be known as the "NEC turnover date."

(2) In the event that the members do not adopt the final compact agreement and make it operational under the schedule set forth in this section, the Secretary of Transportation shall assume control of the entity specified by 49 U.S.C. 24310(b)(2)(A) and shall make such legislative recommendations as the President judges necessary and expedient to Congress that address the monetary contributions by Northeast Corridor states and the District of Columbia that would be necessary to provide continued intercity passenger rail service in the Northeast Corridor.

(j) AUTHORIZATION OF APPROPRIATIONS.--There are authorized such sums as may be necessary to carry out the purposes of this section.

#### **SEC. 104. ASSISTANCE TO ADDRESS CAPITAL NEEDS.**

(a) IN GENERAL.--There are authorized to be appropriated to the Secretary of Transportation, for capital expenditures in compliance with capital spending plans developed under section 202 of this Act, including the Secretary's expenses related thereto, the following amounts:

- (1) such sums as may be necessary for Year Three.
- (2) such sums as may be necessary for Year Four.
- (3) such sums as may be necessary for Year Five.
- (4) such sums as may be necessary for Year Six.

(b) OBLIGATION OPTIONS.--(1) Subject to paragraph (2), the Secretary may obligate the funds authorized by this section through grants to or cooperative agreements with States, the Passenger Rail Service Provider, the North East Corridor Compact or

another qualified Compact, or through contracts with private companies.

(2) Funds appropriated under this section shall not be obligated and not be disbursed from the Treasury for the North East Corridor Compact until it has been established and is empowered and qualified to enter into contracts for the expenditure of the funds.

(c) ELIGIBILITY OF EXPENDITURES.--(1) The Federal share of expenditures for capital improvements under this section may be not more than 100 percent and is solely authorized for the purpose of funding deferred maintenance, safety and security projects. Expenditures for capacity expansion are not authorized by this section.

(2) Funds appropriated under this section may be obligated for an expenditure only if the Secretary has determined in writing that the expenditure on any railroad infrastructure investments is limited to a route or routes with a useful life of at least 5 years.

#### **SEC. 105. EMPLOYEE TRANSITION ASSISTANCE; AUTHORIZATION.**

(a) PROVISION OF FINANCIAL INCENTIVES.-- To facilitate the restructuring required by this title, the Secretary is authorized to develop a program under which the Secretary may, in the Secretary's discretion, provide grants for financial incentives to be provided to employees of the National Railroad Passenger Corporation who voluntarily terminate their employment with the Corporation or the successor corporations and relinquish any legal rights to receive termination-related payments under any contractual agreement with the Corporation or the successor corporations.

(b) CONDITIONS FOR FINANCIAL INCENTIVES.--As a condition for receiving financial assistance grants under this section, the Corporation or the successor corporations must certify that--

(1) the financial assistance results in a net reduction in the total number of employees equal to the number receiving financial incentives,

(2) the financial assistance results in a net reduction in total employment expense equivalent to the total employment expenses associated with the employees receiving financial incentives; and

(3) the total number of employees eligible for termination-related payments will not be increased without the express written consent of the Secretary.

(c) AMOUNT OF FINANCIAL INCENTIVES.--The financial incentives authorized under this section may be no greater than \$50,000.00 per employee.

(d) AUTHORIZATION OF APPROPRIATIONS.--There are hereby authorized to the Secretary such sums as may be necessary to make grants to the National Railroad Passenger Corporation or the successor corporation to fund termination-related payments to employees under existing contractual agreements until four years from the first day of Year One.

#### **SEC. 106. LIMIT ON OPERATING ASSISTANCE FOR LONG-DISTANCE ROUTES.**

(a) IN GENERAL.--Title 49, United States Code, is amended by inserting the following after section 24315:

"Sec. 24316. Limit on operating assistance for long-distance routes

"(a) GENERAL AUTHORITY.--(1) After the last day of Year One, the Secretary of Transportation may make grants for operating assistance under the authority of this section, and not under any other provision of law, to reimburse operators of long-distance routes, as defined in section 24102, and corridor feeder routes for the operating expenses incurred in operating those routes to provide intercity passenger rail transportation.

"(2) The Secretary shall require that a grant under this section be subject to the terms, conditions, requirements, and provisions the Secretary decides are necessary or appropriate for the purposes of this section, including the definition of eligible expenses and the documentation of eligible operating losses on a quarterly basis.

"(b) FEDERAL SHARE OF OPERATING EXPENSES.--(1) No funds appropriated under this Part shall be used to fund operating expenses of a long-distance route after the last day of Year One, except as provided in paragraph (2) of this subsection.

"(2) Funds appropriated under this section may be used to reimburse the operator

of a long-distance route or a corridor feeder route for operating expenses on that route provided that amounts reimbursed do not exceed the operating losses on the route and do not constitute a reimbursement per-passenger mile greater than--

“(A) \$0.40 during Year Two;

“(B) \$0.20 during Year Three;

“(C) \$0.10 during Year Four; and

“(D) \$0.00 for each year thereafter.

“(c) AUTHORIZATION OF APPROPRIATIONS.--There are authorized to be appropriated to the Secretary such sums as may be necessary to carry out this section, including the Secretary's expenses related thereto.

(b) CONFORMING AMENDMENTS.--(1) The analysis of chapter 243 of title 49, United States Code, is amended by inserting the following after the item relating to section 24315:

"24316. Limit on operating assistance for long-distance routes."

(2) Section 24102 (Definitions) of title 49, United States Code, is amended--

(A) by inserting the following after section 24102(4):

“(4a) ‘corridor feeder route’ means a portion of a long distance train or route that provides services between regional corridors by connecting to endpoints of the corridors.”; and

(B) by inserting the following after section 24102(5a), as added by this Act:

“(5b) ‘long distance train’ or ‘long distance route’ means one of or a portion of the following trains or routes operated by the National Railroad Passenger Corporation on the date of enactment of this section: the Silver Star, the Three Rivers, the Cardinal, the Silver Meteor, the Empire Builder, the Capitol Limited, the California Zephyr, the Southwest Chief, the City of New Orleans, the Texas Eagle, the Sunset Limited, the Coast Starlight, the Lake Shore Limited, the Palmetto, the Crescent, the Pennsylvanian, and the Auto Train.”.

## **SEC. 107. REPEAL OF OBSOLETE AND EXECUTED PROVISIONS OF LAW;**

## **OTHER.**

(a) IN GENERAL.--Title 49, United States Code, is amended by repeal of the following sections:

- (1) Section 24701 (Operation of basic system).
- (2) Section 24706 (Discontinuance).
- (3) Section 24901 (Definitions).
- (4) Section 24902 (Goals and Requirements).
- (5) Section 24904 (General Authority).
- (6) Section 24906 (Eliminating highway at-grade crossings).
- (7) Section 24909 (Authorization of appropriations).

(b) REVISIONS TO SECTION 24305.-- (1) Section 24305 (a) is amended by striking paragraph (2) and renumbering paragraph (3) as paragraph (2).

(2) Section 24305(b) is amended by striking paragraph (4) and renumbering paragraph (5) as paragraph (4) and paragraph (6) as paragraph (5).

(3) Subsection 24305(f)(2) is amended by inserting before the word "Amtrak", the following "With regard to items acquired with funds provided by the Federal Government,"

(c) CONFORMING AMENDMENT.--The analysis of chapters 243, 247, and 249 are amended by deleting, as appropriate, items relating to the following sections: 24307, 24701, 24706, 24901, 24902, 24904, 24906, 24908, and 24909.

(d) EFFECTIVE DATE.--The effective date of this section is the first day of Year One.

## **TITLE II--FINANCIAL REFORMS**

### **SEC. 201. LIMITATIONS ON AVAILABILITY OF GRANTS.**

(a) IN GENERAL.--Title 49, United States Code, is amended by inserting the following after section 24313:

#### **"Sec. 24314. Transitional limitations on availability of grants**

"(a) REQUIREMENTS PRIOR TO RESTRUCTURING.--A grant made to the National Railroad Passenger Corporation under the authority of Part C of Subtitle V of this title between the first day of Year One, and the establishment and commencement of

operations by the successor corporations under section 24310 of this title may only be made subject to the following limitations:

"(1) The Secretary of Transportation shall not disburse funding to cover operating losses on a long-distance train route without first receiving and approving a grant request for that specific train route.

"(2) Each such grant request shall be accompanied by a detailed financial analysis and revenue projection justifying the Federal support to the Secretary's satisfaction.

"(3) The Secretary of Transportation and the Board of Directors of the Corporation shall ensure that, of the amount made available by appropriations for capital and operating assistance to the Corporation in a fiscal year, sufficient sums are reserved to satisfy the contractual obligations of the Corporation to provide commuter and intrastate passenger rail service.

"(4) Not later than December 31 prior to each fiscal year in which grants are made to the Corporation, the Corporation shall transmit to the Secretary of Transportation, the Committee on Commerce, Science, and Transportation of the Senate, the Committee on Transportation and Infrastructure of the House, and the House and Senate Committees on Appropriations a business plan for operating and capital improvements to be funded in the fiscal year under section 24104(a) of title 49, United States Code.

"(5) The business plan shall include a description of the work to be funded, along with cost estimates and an estimated timetable for completion of the projects covered by the business plan.

"(6) Each month of each fiscal year in which grants are made to the Corporation, the Corporation shall submit to the Secretary of Transportation, the Committee on Commerce, Science, and Transportation of the Senate, the Committee on Transportation and Infrastructure of the House, and the House and Senate Committees on Appropriations a supplemental report regarding the business plan, which shall describe the work completed to date, any changes to

the business plan, and the reasons for such changes.

"(7) A grant may not be used for operating expenses or capital projects that is not approved by the Secretary of Transportation or an element of the Corporation's current fiscal year business plan, or that is obligated or expended unless the Corporation certifies, as part of the grant agreement, that it has complied with and will abide by the following requirements:

"(A) The Corporation's management will maintain financial controls and accounting transparency to the satisfaction of the Secretary, including developing or enhancing any existing capacity separately to report (a) all revenue and expenses associated with rail operations by route; and (b) budgeted and actual expenditures for all capital investments.

"(B) The Corporation's management will provide to the Board of Directors, the Department of Transportation and Congress its Monthly Performance Report. The Corporation shall also make available to the Department of Transportation the same details and reports on its financial performance that it makes available to Amtrak management, at the same time that it provides those reports and details to Amtrak management.

"(C) The Corporation shall expend funds only for the continuation of existing plants and services. With the exception of expenditures for which it obtains written approval from the Department of Transportation, The Corporation will not use of any of its funds for actual expansion or planning for expansion of rail service, including high speed rail service.

"(D) The Corporation has negotiated with its employees substantial operating cost reductions needed to make its operations competitive with private-sector service providers.

"(b) REQUIREMENTS FOLLOWING RESTRUCTURING.--Any grant made directly to either of the successor corporations under the authority of Part C of Subtitle V of this title may only be made subject to the following limitations:

"(1) The Secretary of Transportation shall not disburse funding to cover

operating losses on a long-distance train route without first receiving and approving a grant request for that specific train route.

"(2) Each such grant request shall be accompanied by a detailed financial analysis and revenue projection justifying the Federal support to the Secretary's satisfaction.

"(3) The Secretary of Transportation shall ensure that, of the amount made available by appropriations for capital and operating assistance in a fiscal year, sufficient sums are reserved to satisfy the successor corporation's contractual obligations, if any, with respect to commuter and intrastate passenger rail service.

"(4) Not later than December 31 prior to each fiscal year in which grants are made, the successor corporations shall each transmit to the Secretary of Transportation a business plan for operating and capital improvements to be funded in the fiscal year.

"(5) The business plan shall include a description of the work to be funded, along with cost estimates and an estimated timetable for completion of the projects covered by the business plan.

"(6) Each month of each fiscal year in which grants are made, the successor corporations shall each submit to the Secretary of Transportation a supplemental report regarding the business plan, which shall describe the work completed to date, any changes to the business plan, and the reasons for such changes.

"(7) A grant may not be used for operating expenses or capital projects that is not approved by the Secretary of Transportation or an element of the current fiscal year business plan, or that is obligated or expended unless the successor corporation agrees, as part of the grant agreement, to abide by the following requirements:

"(A) Management will maintain financial controls and accounting transparency to the satisfaction of the Secretary, including developing or enhancing any existing capacity separately to report (a) all revenue and

expenses associated with rail operations by route; and (b) budgeted and actual expenditures for all capital investments.

"(B) Management of each successor corporation shall make available to the Department of Transportation the same details and reports on its financial performance that it makes available internally, at the same time that it provides those reports and details internally.

"(C) Funds will be spent only on existing plants and services."

(b) CONFORMING AMENDMENTS.--(1) The analysis of chapter 243 of title 49, United States Code, is amended by inserting the following after the item relating to section 24313:

"24314. Transitional limitations on availability of grants."

## **SEC. 202. SPENDING PLANS FOR CAPITAL BACKLOG REDUCTION.**

(a) IN GENERAL.-- Within 6 months after Year One begins, and as a condition of grants to the National Railroad Passenger Corporation between that date and the implementation of the restructuring required under 49 U.S.C. 24310, the Corporation shall prepare a capital spending plan that addresses capital needs, consistent with the funding levels authorized to be provided for Year One and each fiscal year thereafter through Year Six, for--

- (1) Northeast Corridor capital assets; and
- (2) capital assets on long-distance routes other than on the Northeast Corridor; and
- (3) capital assets on short-distance routes other than the Northeast Corridor.

(b) APPROVAL BY THE SECRETARY AND THE COMPACT.--(1) The Corporation shall submit the capital spending plan prepared under this section to the Secretary of Transportation for review and approval. The plan shall be implemented only after approval by the Secretary, and with any modifications specified by the Secretary.

(2) The Secretary of Transportation shall require that the plan be updated at least annually.

(3) On and after creation of North East Corridor Compact, the Secretary shall make no grants to the Compact for Northeast Corridor for capital investments, except in accordance with a capital spending plan prepared by the Compact and approved by both the Compact and the Secretary. The same requirements shall apply to grants made to States and other Compacts under this section.

#### **SEC. 203. REDEMPTION OF COMMON STOCK.**

(a) VALUATION.--The Secretary of Transportation shall arrange, at the National Railroad Passenger Corporation's expense, for a valuation of all assets and liabilities of the Corporation to be performed by the Secretary of the Treasury, or by a contractor selected by the Secretary of the Treasury. Such valuation shall be conducted in accordance with criteria and requirements to be determined by the Secretary, in the Secretary's discretion, and shall be completed within 6 months after Year One begins.

(b) REDEMPTION.--(1) Prior to the transfer of assets to the Secretary directed by section 204 of this Act, and within 9 months after Year One begins, the Corporation shall redeem all common stock in the Corporation issued prior to the date of enactment of this Act at the book value of such stock, based on the valuation performed under subsection (a).

(2) No provision of this Act, or amendments made by this Act, provide to the owners of the common stock a priority over holders of indebtedness or other stock of the Corporation.

(c) ACQUISITION THROUGH EMINENT DOMAIN.--In the event that the Corporation and the owners of its common stock have not completed the redemption of such stock by a date that is within 9 months after Year One begins, the Corporation shall exercise the eminent domain provisions contained in 49 U.S.C. 24311, as amended by this Act, to acquire that stock. The valuation performed under subsection (a) shall be deemed to constitute just compensation except to the extent that the owners of the common stock demonstrate that the valuation is less than the constitutional minimum value of the stock.

(d) AMENDMENT OF 49 U.S.C. 24311.--Section 24311 of title 49, United

States Code, is amended--

(1) by striking “or” at the end of subsection (a)(1)(A);

(2) by striking the period at the end of subsection (a)(1)(B) and substituting “; or”; and

(3) by inserting the following after subsection (a)(1)(B):

“(C) necessary to redeem the Corporation’s common stock from any holder thereof, including a rail carrier.”.

(e) **CONVERSION OF PREFERRED STOCK TO COMMON.**--(1) Subsequent to the redemption of the common stock in the Corporation issued prior to the date of enactment of this Act, the Secretary of Transportation shall convert the one share of the preferred stock of the Corporation retained under section 204 of this Act for ten shares of common stock in the Corporation.

(2) The Corporation shall not issue any other common stock without the express written consent of the Secretary.

#### **SEC. 204. RETIREMENT OF PREFERRED STOCK; TRANSFER OF ASSETS.**

(a) **TRANSFER.**-- Not later than 30 days after the redemption or acquisition specified under section 203 of this Act, the Corporation shall, in return for the consideration specified in subsection (c), transfer to the Secretary of Transportation title to the following assets:

(1) The portions of the Northeast Corridor currently owned or leased by the Corporation as well as any improvements made to these assets. The assets transferred to the Secretary shall include the rail right-of-way, stations, track, signal equipment, electric traction facilities, bridges, tunnels and all other improvements owned by Amtrak between Boston, Massachusetts and Washington, District of Columbia (including the route through Springfield, Massachusetts and the routes to Harrisburg, Pennsylvania and Albany, New York from the Northeast Corridor mainline).

(2) Chicago Union Station and rail-related assets in the Chicago metropolitan area.

(3) All other track and right-of-way, stations, repair facilities and other real property owned or leased by the Corporation.

(b) EXISTING ENCUMBRANCES.--(1) With regard to any assets described in subsection (a) that the Corporation has provided as security or collateral for a debt entered into prior to the date of enactment of this Act, the Corporation shall transfer its underlying legal interest in such asset to the Secretary, provided, however, that the Corporation shall remain liable for the debt secured by the asset.

(2) The obligation of the National Railroad Passenger Corporation to repay in full any indebtedness to the United States incurred since January 1, 1990, is not affected by this Act or an amendment made by this Act.

(c) CONSIDERATION.--In consideration for the assets transferred to the United States under subsection (b) above, the Secretary shall--

(1) deliver to the Corporation all but one share of the preferred stock of the Corporation held by the Secretary and forgive the Corporation's legal obligation to pay any dividends, including accrued but unpaid dividends as of the date of transfer, evidenced by the preferred stock certificates; and

(2) Release the Corporation from all mortgages and liens held by the Secretary that were in existence on January 1, 1990.

(d) AGREEMENT.--(1) Prior to accepting title to the assets transferred under this section, the Secretary shall enter into an agreement with the Corporation under which the Corporation will exercise on behalf of the Secretary care, custody and control of the assets to be transferred.

(2) The agreement shall identify in detail the specific functions of the Corporation's employees and equipment, and the specific numbers and locations of the employees and equipment associated with each function, that would be needed for continuation of commuter and freight rail service in the event that the Corporation were to cease operation, and identify those actions that would be required to ensure that such functions can be continued on an interim basis to avoid any interruption in commuter or freight rail service on the Northeast Corridor.

(e) FURTHER TRANSFERS.— (1) The Secretary may, for appropriate consideration, transfer title to all or part of Chicago Union Station and rail-related assets in the Chicago metropolitan area acquired under this section to a regional public transportation agency that has significant operations in Chicago Union Station on the date of enactment of this Act.

(2) The Secretary may, for appropriate consideration, transfer to the underlying states title to real estate properties owned by the Corporation between Boston, Massachusetts and Washington, District of Columbia that constitute the route through Springfield, Massachusetts and the routes to Harrisburg, Pennsylvania and Albany, New York from the Northeast Corridor mainline.

(3) The Secretary may, for appropriate consideration, transfer title to all or part of the assets acquired under subsection (a)(3) to a State, a public agency, a railroad, or other entity deemed appropriate by the Secretary.

(4) All financial consideration determined by the Secretary to be appropriate consideration for the transfer of the assets described in paragraphs (1)-(3) shall be used exclusively to reduce the Corporation's long-term debt that exists on the date of enactment.

#### **SEC. 205. REAL ESTATE AND ASSET SALES; OTHER.**

(a) IN GENERAL.--The Amtrak Board of Directors shall undertake and complete not later than the last day of Year Three, the disposition of all stations, track, and other facilities outside the Northeast Corridor mainline, including property conveyed to the Secretary of Transportation under section 204 of this Act.

(b) PROCEEDS OF LIQUIDATION.--Notwithstanding section 3302 of title 31, United States Code, any proceeds from the liquidation of assets under this section shall--

(1) be credited as an offsetting collection to the account that finances grants for debt and interest payments under section 206 of this Act to the Passenger Rail Service Provider specified under 49 U.S.C. 24310; and

(2) remain available until expended.

#### **SEC. 206. MANAGEMENT AND TRANSFER OF SECURED DEBT.**

(a) NEW DEBT PROHIBITION.--Except as approved by the Secretary of Transportation to re-finance existing secured debt, the Corporation shall not enter into any obligation secured by assets of the Corporation after the date of enactment of this Act. This section does not prohibit unsecured lines of credit used by the Corporation or any subsidiary for working capital purposes.

(b) SECURED DEBT TRANSFER.--(1) Upon establishment of the Passenger Rail Service Provider specified under 49 U.S.C. 24310 and the transfer of ownership of the existing rolling stock, all debt secured by the rolling stock shall be transferred to and become a liability solely of, the Passenger Rail Service Provider.

(2) Upon establishment of the North East Corridor Compact under section 103 of this Act, the secured debt associated with fixed assets in the Northeast Corridor shall be transferred to and become a liability solely of, the North East Corridor Compact.

(c) AUTHORIZATION.--(1) There are authorized to be appropriated to the Secretary for grants to the Passenger Rail Service Provider to pay principal and interest payments on secured debt existing on the date of enactment of this Act the following amounts:

- (1) such sums as may be necessary in Year Two.
- (2) such sums as may be necessary in Year Three.
- (3) such sums as may be necessary in Year Four.
- (4) such sums as may be necessary in Year Five.
- (5) such sums as may be necessary in Year Six.
- (2) The funding authorized by this section shall not--

(A) modify the extent or nature of any indebtedness of the National Railroad Passenger Corporation to the United States in existence of the date of enactment of this Act;

(B) change the private nature of Amtrak's or its successors' liabilities; or

(C) imply any Federal guarantee or commitment to amortize Amtrak's outstanding indebtedness.

## **SEC. 207. TRANSITION ASSISTANCE.**

(a) YEAR ONE ASSISTANCE.--There are authorized to be appropriated to the Secretary for grants to the National Railroad Passenger Corporation for operating and capital expenses such sums as may be necessary in Year One.

(b) YEAR TWO SUCCESSOR CORPORATION OPERATING ASSISTANCE.-  
- There are authorized to be appropriated to the Secretary such sums as may be necessary for grants to--

(1) the Passenger Rail Service Provider for operating expenses of all services except long-distance trains and routes in Year Two; and

(2) the Passenger Rail Infrastructure Manager for capital expenses in Year Two.

(c) ADMINISTRATIVE EXPENSES OF COMPACTS.-- There are authorized to be appropriated to the Secretary such sums as may be necessary for grants for the administrative expenses of interstate compacts in Years One through Three.

(d) EXPENSES OF AMTRAK.-- There are authorized to be appropriated to the Secretary such sums as may be necessary for grants for the administrative expenses of Amtrak in Years Two through Six..

(e) GRANTS MADE AFTER YEAR TWO.-- After the last day of Year Two, the Secretary may not enter into a grant agreement under this Act, other than section 206(c), or part C of Title V of title 49, United States Code, unless each other party to the grant agreement is a State, regional compact, or other public entity.

### **TITLE III-- GRANTS AND OTHER ASSISTANCE FOR INTERCITY PASSENGER RAIL SERVICE**

#### **SEC. 301. CAPITAL ASSISTANCE FOR INTERCITY PASSENGER RAIL SERVICE.**

(a) Part C of Subtitle V of title 49, United States Code, is amended by inserting the following after chapter 243:

#### **"CHAPTER 244--INTERCITY PASSENGER RAIL SERVICE CORRIDOR CAPITAL ASSISTANCE**

"Sec.

"24401. Definitions; effective date.

"24402. Capital investment grants to support intercity passenger rail service.

"24403. Project management oversight

"24404. Use of capital grants to finance first-dollar liability of grant project.

"24405. Authorization of appropriations.

"Sec. 24401. Definitions; effective date.

"(a) DEFINITIONS.--In this chapter--

"(1) 'applicant' means a State, an Interstate Compact (including the North East Corridor Compact as specified in section 103 of the Passenger Rail Investment Reform Act), or a public agency established by one or more States and having responsibility for providing intercity passenger rail service.

"(2) 'capital project' means a project within a corridor plan or program for--

"(A) acquiring, constructing, supervising or inspecting equipment or a facility for use in intercity passenger rail service, expenses incidental to the acquisition or construction (including designing, engineering, location surveying, mapping, environmental studies, and acquiring rights-of-way), payments for the capital portions of rail trackage rights agreements, passenger rail-related intelligent transportation systems, highway-rail grade crossing improvements on routes used for intercity passenger rail service, relocation assistance, acquiring replacement housing sites, and acquiring, constructing, relocating, and rehabilitating replacement housing;

"(B) rehabilitating, remanufacturing or overhauling rail rolling stock and facilities used primarily in intercity passenger rail service; and

"(C) the first-dollar liability costs for insurance related to the provision of intercity passenger rail service.

"(3) 'intercity passenger rail service' means transportation services with the primary purpose of passenger transportation between towns, cities and metropolitan areas by rail, including high-speed rail.

"(b) EFFECTIVE DATE.--This chapter is effective on the first day of Year Two.

"Sec. 24402. Capital investment grants to support intercity passenger rail service

"(a) GENERAL AUTHORITY.--(1) The Secretary of Transportation may make grants under this section to an applicant to assist in financing the capital costs of facilities and equipment necessary to provide intercity passenger rail transportation.

"(2) The Secretary shall require that a grant under this section be subject to the terms, conditions, requirements, and provisions the Secretary decides are necessary or appropriate for the purposes of this section, including requirements for the disposition of net increases in value of real property resulting from the project assisted under this section.

"(3) A grant under this section may not be made for a project or program of projects that qualifies for financial assistance under chapter 53 of this title.

"(b) PROJECT AS PART OF APPROVED PROGRAM.--(1) The Secretary may not approve a grant for a project under this section unless the Secretary finds that the project is part of an approved corridor plan and program developed under section 5303 of this title and that the applicant or recipient has or will have the legal, financial, and technical capacity to carry out the project (including safety and security aspects of the project), satisfactory continuing control over the use of the equipment or facilities, and the capability and willingness to maintain the equipment or facilities.

"(2) An applicant shall provide sufficient information upon which the Secretary can make the findings required by this subsection.

"(3) If an applicant has not selected the proposed operator of its service competitively, the applicant shall provide written justification to the Secretary showing why the proposed operator is the best, taking into account price and other factors, and that use of the proposed operator will not increase the capital cost of the project.

"(4) An applicant shall demonstrate that it has agreed with the railroad over which the intercity passenger rail service will operate concerning the applicant's operating and capital plans.

"(c) LETTERS OF INTENT, FULL FUNDING GRANT AGREEMENTS, AND EARLY SYSTEMS WORK AGREEMENTS.--(1)(A) The Secretary may issue a letter of intent to an applicant announcing an intention to obligate, for a major capital project

under this section, an amount from future available budget authority specified in law that is not more than the amount stipulated as the financial participation of the Secretary in the project.

"(B) At least 30 days before issuing a letter under subparagraph (A) of this paragraph or entering into a full funding grant agreement, the Secretary shall notify in writing the Committee on Transportation and Infrastructure of the House of Representatives and the Committee on Commerce, Science, and Transportation of the Senate and the House and Senate Committees on Appropriations of the proposed letter or agreement. The Secretary shall include with the notification a copy of the proposed letter or agreement as well as the evaluations and ratings for the project.

"(C) The issuance of a letter is deemed not to be an obligation under sections 1108(c) and (d), 1501, and 1502(a) of title 31, U.S.C., or an administrative commitment.

"(D) An obligation or administrative commitment may be made only when amounts are appropriated.

"(2)(A) The Secretary may make a full funding grant agreement with an applicant. The agreement shall--

"(i) establish the terms of participation by the United States Government in a project under this section;

"(ii) establish the maximum amount of Government financial assistance for the project;

"(iii) cover the period of time for completing the project, including a period extending beyond the period of an authorization; and

"(iv) make timely and efficient management of the project easier according to the law of the United States.

"(B) An agreement under this paragraph obligates an amount of available budget authority specified in law and may include a commitment, contingent on amounts to be specified in law in advance for commitments under this paragraph, to obligate an additional amount from future available budget authority specified in law. The agreement shall state that the contingent commitment is not an obligation of the Government and is

subject to subject to the availability of appropriations made by Federal law and to Federal laws in force on or enacted after the date of the contingent commitment. Interest and other financing costs of efficiently carrying out a part of the project within a reasonable time are a cost of carrying out the project under a full funding grant agreement, except that eligible costs may not be more than the cost of the most favorable financing terms reasonably available for the project at the time of borrowing. The applicant shall certify, in a way satisfactory to the Secretary, that the applicant has shown reasonable diligence in seeking the most favorable financing terms.

"(3)(A) The Secretary may make an early systems work agreement with an applicant if a record of decision under the National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq.) has been issued on the project and the Secretary finds there is reason to believe--

"(i) a full funding grant agreement for the project will be made; and

"(ii) the terms of the work agreement will promote ultimate completion of the project more rapidly and at less cost.

"(B) A work agreement under this paragraph obligates an amount of available budget authority specified in law and shall provide for reimbursement of preliminary costs of carrying out the project, including land acquisition, timely procurement of system elements for which specifications are decided, and other activities the Secretary decides are appropriate to make efficient, long-term project management easier. A work agreement shall cover the period of time the Secretary considers appropriate. The period may extend beyond the period of current authorization. Interest and other financing costs of efficiently carrying out the work agreement within a reasonable time are a cost of carrying out the agreement, except that eligible costs may not be more than the cost of the most favorable financing terms reasonably available for the project at the time of borrowing. The applicant shall certify, in a way satisfactory to the Secretary, that the applicant has shown reasonable diligence in seeking the most favorable financing terms. If an applicant does not carry out the project for reasons within the control of the applicant, the applicant shall repay all Government payments made under the work

agreement plus reasonable interest and penalty charges the Secretary establishes in the agreement.

"(4) The total estimated amount of future obligations of the Government and contingent commitments to incur obligations covered by all outstanding letters of intent, full funding grant agreements, and early systems work agreements may be not more than the amount authorized under section 24405 of this title, less an amount the Secretary reasonably estimates is necessary for grants under this section not covered by a letter. The total amount covered by new letters and contingent commitments included in full funding grant agreements and early systems work agreements may be not more than a limitation specified in law.

"(d) FEDERAL SHARE OF NET PROJECT COST.--(1)(A) Based on engineering studies, studies of economic feasibility, and information on the expected use of equipment or facilities, the Secretary shall estimate the net project cost.

"(B) A grant for the project shall not exceed the specified percentage of the project net capital cost established for the year the grant is approved, as follows:

"(i) 100 percent in the case of approval for Year Two.

"(ii) 80 percent in the case of approval for Year Three.

"(iii) 60 percent in the case of approval for Year Four.

"(iii) 50 percent in the case of approval for Year Five, and thereafter.

"(C) The Secretary shall give priority in allocating future obligations and contingent commitments to incur obligations to grant requests seeking a lower federal share of the project net capital cost.

"(2) Up to an additional 30 percent of project net capital cost may be funded from amounts appropriated to or made available to a department or agency of the Federal Government that are eligible to be expended for transportation.

"(e) UNDERTAKING PROJECTS IN ADVANCE.--(1) The Secretary may pay the Federal share of the net capital project cost to an applicant that carries out any part of a project described in this section according to all applicable procedures and requirements if--

"(A) the applicant applies for the payment;

"(B) the Secretary approves the payment; and

"(C) before carrying out the part of the project, the Secretary approves the plans and specifications for the part in the same way as other projects under this section.

"(2) The cost of carrying out part of a project includes the amount of interest earned and payable on bonds issued by the applicant to the extent proceeds of the bonds are expended in carrying out the part. However, the amount of interest under this paragraph may not be more than the most favorable interest terms reasonably available for the project at the time of borrowing. The applicant shall certify, in a manner satisfactory to the Secretary, that the applicant has shown reasonable diligence in seeking the most favorable financial terms.

"(3) The Secretary shall consider changes in capital project cost indices when determining the estimated cost under paragraph (2) of this subsection."

"Sec. 24403. Project management oversight

"(a) PROJECT MANAGEMENT PLAN REQUIREMENTS.--To receive Federal financial assistance for a major capital project under this chapter, an applicant must prepare and carry out a project management plan approved by the Secretary of Transportation. The plan shall provide for--

"(1) adequate recipient staff organization with well-defined reporting relationships, statements of functional responsibilities, job descriptions, and job qualifications;

"(2) a budget covering the project management organization, appropriate consultants, property acquisition, utility relocation, systems demonstration staff, audits, and miscellaneous payments the recipient may be prepared to justify;

"(3) a construction schedule for the project;

"(4) a document control procedure and recordkeeping system;

"(5) a change order procedure that includes a documented, systematic approach to handling the construction change orders;

"(6) organizational structures, management skills, and staffing levels required throughout the construction phase;

"(7) quality control and quality assurance functions, procedures, and responsibilities for construction, system installation, and integration of system components;

"(8) material testing policies and procedures;

"(9) internal plan implementation and reporting requirements;

"(10) criteria and procedures to be used for testing the operational system or its major components;

"(11) periodic updates of the plan, especially related to project budget and project schedule, financing, and ridership estimates;

"(12) the recipient's commitment to submit a project budget and project schedule to the Secretary each month.

"(b) SECRETARIAL OVERSIGHT.--(1) The Secretary may use no more than 0.5 percent of amounts made available in a fiscal year for capital projects under this chapter to enter into contracts to oversee the construction of such projects.

"(2) The Secretary may use amounts available under paragraph (1) of this subsection to make contracts for safety, procurement, management, and financial compliance reviews and audits of a recipient of amounts under paragraph (1)

"(3) The Federal Government shall pay the entire cost of carrying out a contract under this subsection.

"(c) ACCESS TO SITES AND RECORDS.--Each recipient of assistance under this chapter shall provide the Secretary and a contractor the Secretary chooses under subsection (c) of this section with access to the construction sites and records of the recipient when reasonably necessary.

'(e) REGULATIONS.-- The Secretary shall prescribe regulations necessary to carry out this section. The regulations shall include--

"(1) a definition of "major capital project" for this section; and

"(2) a requirement that oversight begin during the preliminary engineering

stage of a project, unless the Secretary finds it more appropriate to begin oversight during another stage of a project, to maximize the transportation benefits and cost savings associated with project management oversight;

“(3) a deadline by which all grant applications for a fiscal year must be submitted that is early enough to permit the Secretary to evaluate all timely applications thoroughly before making grants;

“(4) a formula based on population, track miles of railroad, and passenger miles traveled in the prior fiscal year by which one-half of the funds appropriated for capital grants for each fiscal year are to be allocated among the states;

“(5) a requirement that, if a State does not timely apply for its share of formula grant funds under paragraph (4) of this subsection, those funds will be made available to other States under paragraph (6) of this subsection;

“(6) criteria by which the Secretary will allocate one-half of the funds appropriated for capital grants for each fiscal year, including at least projected ridership, passenger rail and intermodal connections, congestion and air quality mitigation, underserved communities, and the effect of the grant on whether existing service will continue.

"Sec. 24404. Use of capital grants to finance first-dollar liability of grant project

"Notwithstanding the requirements of section 24402 of this title, the Secretary of Transportation may approve the use of capital assistance under this chapter to fund self-insured retention of risk for the first tier of liability insurance coverage for rail passenger service associated with the capital assistance grant, but the coverage may not exceed \$20 million per occurrence or \$20 million in aggregate per year.

"Sec. 24405. Authorization of appropriations

"There are authorized to be appropriated to make capital financial assistance grants under this chapter, including the Secretary's expenses related thereto, the following amounts:

"(1) such sums as may be necessary in Year Two.

"(2) such sums as may be necessary in Year Three.

"(3) such sums as may be necessary in Year Four.

"(4) such sums as may be necessary in Year Five.

"(5) such sums as may be necessary in Year Six."

(b) CONFORMING AMENDMENTS.--(1) The table of chapters for title 49, United States Code, is amended by inserting the following after the item relating to chapter 243:

"244. Intercity Passenger Rail Service Capital Assistance .....24401".

(2) The chapter analysis for Subtitle V of title 49, United States Code, is amended by inserting the following after the item relating to chapter 243:

"244. Intercity Passenger Rail Service Capital Assistance .....24401".

### **SEC. 302. FINAL REGULATIONS ON APPLICATIONS BY STATES FOR DEVELOPMENT GRANTS.**

Not later than June 1 of Year One, the Administrator of the Federal Railroad Administration shall issue final regulations setting forth procedures for application and minimum requirements for the award of grants on and after the first day of Year Two, under chapter 244 of title 49, United States Code.

### **SEC. 303. AUTHORITY FOR INTERSTATE COMPACTS FOR CORRIDOR DEVELOPMENT.**

(a) CONSENT TO COMPACTS--(1) Two or more States with an interest in a specific form, route, or corridor of intercity passenger rail service (including high speed rail service) may enter into interstate compacts to implement the service, including--

(1) retaining an existing service or commencing a new service;

(2) assembling rights-of-way; and

(3) performing capital improvements, including -

(A) the construction and rehabilitation of maintenance facilities;

(B) the purchase of rolling stock; and

(C) operational improvements, including communications, signals, and other systems.

(2) A compact entered into under the authority of this section shall be submitted

to Congress for its consent, and it is the sense of Congress that rapid consent to the Compact shall be a priority of Congress.

(b) FINANCING.--(1) An interstate compact established by States under subsection (a) may provide that, in order to carry out the compact, the States may--

(A) accept contributions from a unit of State or local government or a person;

(B) use any Federal or State funds made available for intercity passenger rail service (except funds made available for Amtrak);

(C) on such terms and conditions as the States consider advisable--

(i) borrow money on a short-term basis and issue notes for the borrowing; and

(ii) issue bonds; and

(D) obtain financing by other means permitted under Federal or State law.

(2) Bonds and other indebtedness incurred under the authority of this subsection shall under no circumstances be backed by the full faith and credit of the United States,

## Sectional Analysis

Summary: The purpose of the bill is to undertake a restructuring of intercity passenger rail transportation in the United States that will increase management accountability and encourage response to market forces. The assumption adopted in 1970, at the time Amtrak was established, that a single for-profit private entity could succeed in planning and providing nation-wide passenger rail service has long since been shown to be unworkable. The losses of several predecessor railroads on passenger service foreshadowed this outcome and, in any case, the federal government has provided \$29 billion in subsidies to Amtrak over its 34-year existence.

Notwithstanding Congress' enactment in 1997 of a strong reform mandate, Amtrak has demonstrated since that date that, in its current form, it is either unwilling or incapable of rationalizing its operations. Five principles for change are:

- Create a system driven by sound economics.
- Require that Amtrak transition to a pure operating company.
- Introduce carefully managed competition to provide higher quality rail services at reasonable prices.
- Establish a long-term partnership between the states and the Federal government to support intercity passenger rail service.
- Create an effective public partnership, after a reasonable transition, to manage the capital assets of the Northeast Corridor.

This bill proposes a different course for Amtrak, one that has been shown to be viable and beneficial in earlier examples of legislative restructuring in the transportation area. One instructive example is the transfer of the Alaska Railroad, a federally owned and operated railroad, to the State of Alaska in 1985. More recently, in 1987, the federal government entered into a long-term lease of the two federally owned airports in the metropolitan Washington region (Reagan National and Dulles International) to an airport authority created by the Commonwealth of Virginia and the District of Columbia. In both cases, governmental entities with a direct stake in the service accepted planning and management responsibility for these facilities, with subsequent major improvements. A third example, very close to the Amtrak situation, was the Northeast Rail Service Act of 1981, which provided for transfer of Conrail commuter operations in the Northeast Corridor to the states or localities involved, or to an alternative Amtrak operating subsidiary that was not considered a serious competitor at the time. This shift in responsibility also succeeded.

The model for the restructuring proposed in the bill is the Federal-State-local partnership found in the public transit mode. Under this model, the regional, state, or local entity ("public entity") makes the fundamental decisions about what service is justified, undertakes the planning that fits this service into overall passenger transportation patterns in the area, and manages the enterprise to best advantage. The federal role is to participate in making capital investments that support high-quality, integrated services in an area, but not to subsidize service that the local entity itself would not subsidize.

Throughout the bill and this analysis, the timeframe for actions is expressed in relation to the date of enactment and the subsequent fiscal year (that is, the first fiscal year after enactment is defined to be "Year One,"), with subsequent years identified in the same manner. If the legislation is enacted sooner than 61 days after a fiscal year begins, that fiscal year is defined to be "Year One."

The bill consists of three Titles. Title I provides the foundation for Amtrak's future--the basic realignment of Amtrak management and services that would permit a public entity to inherit and enhance existing routes through decisions that it has the ability to develop and implement itself. Specifically, (1) the Board of Directors would be directed to restructure Amtrak to prepare for the transfer of decisions about what service to provide and how to pay for it to public entities; (2) all but a few residual but important legal rights and duties would be shifted into two separate, free-standing corporations (along with associated personnel and assets) that would undertake arms-length contracting with public entities for services starting not later than the second year after enactment; (3) a North East Corridor Compact Commission would be created to formulate an interstate compact among the eight states comprising the Northeast Corridor and the District of Columbia to, under a 99-year lease from the United States, manage all rail operations in the Corridor; (4) an employee severance payment modeled on that provided to Conrail employees in the Northeast Rail Service Act of 1981 would be offered to current Amtrak employees; and (5) a schedule for phased reduction of operating subsidies to Amtrak's 17 long-distance routes would be put in place over the second through sixth years after enactment, to enable states or groups of states to determine whether and how to continue these operations in whole or part.

Title II addresses the many financial matters Amtrak must deal with to ready itself for transfer of services and equipment and other assets to successor organizations. Specifically, (1) the important Fiscal Year 2005 limits on grants to Amtrak to ensure more accountability would be made permanent for the transition period of continued operations by Amtrak; (2) Amtrak would prepare the necessary financial and engineering plans to address the backlog of capital projects in the Northeast Corridor and elsewhere; (3) Amtrak's common stock would be redeemed or acquired by eminent domain at book value to simplify the corporate structure in advance of transfers; (4) an exchange of assets held by Amtrak and debt held by the United States would occur to place the fee simple title to the Northeast Corridor and other assets in the United States for subsequent lease or transfer to other government entities; (5) unneeded real estate and other facilities would be liquidated over the 2006-2008 timeframe; (6) the outstanding debt secured by real estate and rolling stock would be readied for transfer to the entities that accept this property, with a process for possibly refinancing the debt at more favorable rates; and (7) necessary operating and other assistance to effectuate transfer would be authorized.

Title III establishes the permanent federal program of grant assistance for capital projects to be provided to the public entities that succeed to Amtrak nation-wide, including the Northeast Corridor. This title is intentionally structured to parallel the existing capital assistance program for public transit (49 U.S.C. 5309). It is quite likely that existing

transit properties will accept management responsibility for existing Amtrak services in some metropolitan locales and would benefit from adoption of a familiar, time-proven, grant program mechanism.

Short Title and Purposes: The Act would be named the "Passenger Rail Investment Reform Act." This signifies that the bill is designed to maintain and enhance rail passenger service nation-wide, not to undermine it.

The purposes of the bill emphasize the need to restructure passenger rail service in the United States to adapt to competition from other modes by establishing a long-term partnership among the states and the Federal government to support intercity passenger rail service through mutual commitment.

### Title I-- National Passenger Rail Service Restructuring

Transition Board of Directors: Section 101 would expand the current 7-member, reform Board of Directors to 11 members, to equip the Board with enough depth and expertise, such as corporate financial management and accounting experience, to undertake the many transition duties set forth in the bill. Current members would continue to serve for their established terms, the Department of Transportation (DOT) Secretary would remain as an ex officio voting member, and the Amtrak President would remain as an ex officio non-voting member. Due to decreased membership because of the expiration of terms over recent years, a quorum of members for conducting business is defined as a "majority of the Board members who have been lawfully appointed." This will allow decisions to be reached and implemented while additional Presidential appointees are considered by the United States Senate.

To ensure that the valuable rail assets currently held by Amtrak are used to best advantage and in the public interest, the Board of Directors would be directed to form an Asset Transition Committee comprised of the DOT Secretary and two other Board members (or one other member if two other members are not lawfully appointed). The Asset Transition Committee would ensure that the public interest is served in Board decisions and Amtrak management actions that change the use of or status of (1) the Amtrak's contractual right of access to rail lines of other railroads; (2) Amtrak secured debt; (3) Northeast Corridor real property and assets; and (4) rolling stock. This committee would approve any Amtrak management actions that would affect the four subject areas.

Elsewhere in the bill, Amtrak is directed to transfer most of its personnel, assets, and duties to two successor corporations. In recognition of the public nature of the remaining duties following these transfers, the Transition Board of Directors would then be reduced to three ex officio officials of the Department of Transportation: the Secretary of Transportation and possibly the Federal Railroad Administrator and Federal Transit Administrator. The residual duties are set forth below. The other members of the Transition Board of Directors would thereafter no longer serve as appointees of the President to the Amtrak Board of Directors, but could instead become members of the

Board of Directors of the successor corporations.

Passenger Rail Service Restructuring: Section 102 sets forth requirements for the fundamental restructuring of Amtrak to prepare for the transfer of its duties, personnel, and assets to successor entities. Within 6 months of the beginning of Year One, the Board of Directors is required to prepare a plan to restructure Amtrak management, personnel, assets, operations, and other activities and relationships into three entities: (1) a "holding company" staff to oversee and manage Amtrak's contracts with host railroads, including the "right of access" to rail lines of other rail carriers, and contracts with operators of passenger trains chosen by states or interstate compacts (including the rail passenger service provider discussed next); (2) a nationwide rail passenger service operator, to continue rail services and to include the Reservations Center and rolling stock ownership and maintenance; and (3) a rail infrastructure manager. This would involve the assignment of all Amtrak personnel by name to one of the entities and the division of accounting, finance, budget, and assets to provide for the operation and funding of each entity independently. Amtrak would operate under this division of responsibility as of the first day of Year Two.

An initial step in the restructuring would be the requirement that Amtrak file appropriate Articles of Incorporation under state law for two business corporations that are entirely independent of Amtrak, referred to in the legislation as the "Passenger Rail Service Provider" and the "Passenger Rail Infrastructure Manager" or the "successor corporations." No later than the first day of Year Two, the two divisions of Amtrak that generally correspond to the descriptions of the successor corporations would be transferred to create the successor corporations. Employees of Amtrak on the date of enactment would retain their pay and benefits, seniority, and other collective bargaining rights for a minimum of four years from date of transfer. The corporations would only undertake railroad activities on a contractual basis with Amtrak or another entity.

The first successor corporation, the Passenger Rail Service Provider, would enjoy the exclusive right, until the last day of Year Three, to continue to provide the intercity passenger service that is being provided by Amtrak on the date of enactment, and would provide interline reservations services to any other provider of intercity passenger rail services on the same basis and rates as services are provided to the operational entities that provide service within Amtrak on the date of enactment. This corporation would also take ownership of Amtrak rolling stock and associated debt. The President of Amtrak on the date of enactment of this section would be offered the position of Chief Executive Officer of the Passenger Rail Service Provider. Prior to the last day of Year Three, a competitive process would be required to decide who would provide services after that date.

The second successor corporation, the Passenger Rail Infrastructure Manager, would enjoy the exclusive right, until the last day of Year Six, to continue to provide the dispatching, maintenance, and infrastructure services that are being provided by Amtrak on the date of enactment in the Northeast Corridor, and would begin to carry out the capital backlog investment plan prepared by Amtrak, to the extent funds are made available. Prior to the last day of Year Six, a competitive process would be required to decide who would provide those services after that date.

While the successor corporations and the “holdover company” entity have no common carrier obligations, they would continue to be subject to laws and regulations governing railroad safety, employee representation for collective bargaining purposes, the handling of disputes between carriers and employees, employee retirement, annuity, and unemployment systems, and other dealings with employees that apply to a rail carrier providing transportation subject to subchapter I of chapter 105 of title 49, U.S.C. In addition, retirement, annuity, and unemployment system rights would be maintained for employees in the remaining Amtrak entity.

This section directly addresses the interests of commuter authorities and freight railroads whose facilities and operations are intertwined with Amtrak's. As a general matter, Amtrak is required to ensure that the implementation of the restructuring gives due consideration to the needs of freight and commuter rail operations that, as of the effective date of the Act, operate in the Northeast Corridor on Amtrak right of way. In addition, two restrictions are placed on use of the "right of access" to freight lines as of the date of enactment: (1) the terms and conditions for operation of an intercity passenger rail route or frequency that is not in place on the date of enactment of this section would be subject entirely to negotiation and mutual agreement between the host railroad and Amtrak, or any successor to Amtrak, and would not operate under the pre-existing right of access; and (2) the right of access to any segment of rail line of another rail carrier would not be available to more than one intercity passenger rail operator, whether Amtrak or a successor to Amtrak, during any period of rail passenger service over that line.

Other portions of the section address the terms that would apply after "exclusive rights" for the successor corporations terminate if a public entity chooses to replace the successor corporations. For example, "legacy equipment" (rolling stock associated with a particular route) would be made available on an equitable basis, and passenger reservations services would be provided at reasonable cost.

North East Corridor Compact: Under section 103, Congress would encourage creation of an interstate compact among the eight states that comprise the Northeast Corridor, plus the District of Columbia, to succeed to Amtrak as the provider of passenger rail services in the Corridor. The United States would lease the Corridor and its facilities to the NEC Compact for 99 years at no cost. The Compact would, in turn, accept full responsibility for managing service at its expense, with the exception of capital grant assistance. The Compact would be established no later than the last day of Year Two, and operating no later than the following June. The Compact would contract with the two successor corporations at least until the end of the periods of exclusive rights enjoyed by the corporations, and thereafter at the option of the Compact if the contracts are competed.

The minimum responsibilities and authorities of the Compact specified by section 103 are as follows: (1) full responsibility for 99 years to succeed to Amtrak as operator of the Northeast Corridor, subject to the provisions of a lease from the Department of Transportation; (2) execution of a lease of the Northeast Corridor from the Department of Transportation for a period of 99 years; (3) responsibility for Corridor maintenance and improvement; (4) operation of intercity passenger rail service; (5) arrangements for operation of freight railroad operations and commuter operations; (6) assumption of

financial responsibility for Northeast Corridor functions; (7) authority to make use of the Corridor for non-rail purposes; and (8) provision for participation by the U.S. Department of Transportation as the non-voting representative of the United States. Authority (7) contemplates creative use of the Corridor right of way and easements to help finance Corridor operations over the long term.

The section provides for a "Compact Commission" of five members that must propose a Compact for adoption no later than the last day of Year One. Two of the members are appointed by the DOT Secretary; two by the governors of the Northeast Corridor states and the Mayor of the District of Columbia; and a fifth member chosen mutually by the other four members. Elsewhere, section 207(c) of the bill provides an authorization of funding for the activities of the Commission. In addition to the Compact responsibilities and authorities set forth above, the Commission must create a Compact that addresses the basis for Compact debt issuances; the assurance that the federal government is "held harmless" as to lease of the Corridor; and guarantee of any residual rights of organized employees who transfer to a replacement organization from a successor corporation. The Commission would terminate upon the completion of its work.

Three inducements to adoption of the Compact are provided by this section or elsewhere in the bill. First, the "backlog" capital funding authorized to bring the Corridor to a state of good repair would not be released until the Compact is established and operationally prepared to accept a grant. This best assures that this large amount of capital investment will be made in ways that best serve the passenger rail service the Compact decides to provide. Second, commuter services headquartered in a state that does not join the compact would pay fully allocated costs of commuter operations on the Corridor after the last day of Year Two. Third, in the event the Compact is not adopted, the legislative directs that the DOT Secretary to make appropriate legislative recommendations to Congress that address the monetary contributions by Northeast Corridor states and the District of Columbia that would be necessary to provide continued intercity passenger rail service to those states and the District.

Assistance to Address Capital Needs: Section 104 provides an authorization for "backlog" capital assistance grants on a one-time basis (spread over several years) to restore rail facilities and equipment nation-wide, including bringing the Northeast Corridor back to a state of good repair, consistent with capital spending plans developed under section 202 of the bill. In the case of the Northeast Corridor, the funding would only be released when the NEC Compact is functional. Such sums as may be necessary are authorized to be appropriated over the timeframe of Years Three through Six. The federal share of expenditures for capital improvements under this section would be up to 100 percent but solely for the purpose of funding deferred maintenance, safety and security projects. Expenditures for capacity expansion are not authorized by this section.

Employee Transition Assistance: Section 105 provides an authorization for voluntary buyouts for current Amtrak employees that are modeled on, but (when adjusted for inflation) are more generous than, those available to Conrail employees at the time Conrail was readied for sale to the private sector. A maximum payment of \$50,000

would be offered during Years One and Two to employees of Amtrak who voluntarily terminate their employment with Amtrak and relinquish any legal rights to receive termination-related payments under any contractual agreement with Amtrak. Amtrak would be required to certify that the financial assistance results in a net reduction in the total number of employees of Amtrak equal to the number receiving financial incentives; the financial assistance results in a net reduction in the total employment expense of Amtrak equivalent to the total employment expenses associated with the employees receiving financial incentives; and Amtrak would not increase the total number of employees eligible for termination-related payments without the express written consent of the DOT Secretary.

Limit on Operating Assistance for Long-Distance Routes: Section 106 provides an authorization for a gradual reduction in and phase-out of the federal subsidies of Amtrak's 17 "long-distance" routes, over a five-year period to permit adequate time for the adjustments in service or provision of state-funded operating subsidies that would permit continuation of service desired by affected states. States or interstate compacts might be able to preserve some long distance routes by making modest incremental improvements in their economic performance each year. In other cases, states or interstate compacts might decide that they want to preserve a portion of a long distance route that performs well and stop or reconfigure other portions. Section 106 is designed to facilitate such decisions by the states. The technique proposed would effectively preserve the existing subsidy levels longest for the most cost-efficient service, by capping the per-passenger mile subsidy amount at \$0.40 in the first year of restriction (Year Two) and gradually reducing the cap to \$0.10 in the last year of subsidy (Year Five). This relatively long transition for long distance routes compared to other routes is provided in recognition that it is more difficult to form interstate compacts among large numbers of states and the states involved with long distance routes may need more time to work out what to do and implement it.

## Title II--Financial Reforms

Limitations on Availability of Grants to Amtrak: Section 201 would make permanent the important Fiscal Year 2005 restrictions on grants to Amtrak that bring more accountability to the use of those federal funds. Because two successor corporations will take over from Amtrak in Year Two, a revised form of the restrictions would then be applicable to them, as appropriate to their duties.

Spending Plans for Capital Backlog Reduction: Section 202 would direct Amtrak to undertake the development of the backlog capital investment plans for the Northeast Corridor and elsewhere in the system. The plan would be required within 6 months of the beginning of Year One, and this section would specify that Amtrak submit the capital spending plan prepared under this section to the Secretary of Transportation for review and approval. The plan could be implemented only after approval by the Secretary, and with any modifications specified by the Secretary. When the NEC Compact becomes effective, it would take over the plan for the Corridor. Authorizations for grants is separately provided in section 104 of the bill.

Redemption of Common Stock: Section 203 provides for the redemption of Amtrak common stock, to simplify the governance of the corporation as it is restructured. Given Amtrak's current assets and liabilities, it is anticipated that the common stock has little or no value. This section would provide for mandatory redemption of the stock on the basis of current book value, after an impartial valuation supervised by the Secretary of the Treasury. In the event the shareholders do not accept this outcome voluntarily, the section provides for use of Amtrak's eminent domain authority to acquire the stock. Judicial review of such an action would be limited to the question of just compensation. The common stock would not be reissued, with the exception of a token amount to the DOT Secretary in recognition of the financial contributions of the United States to Amtrak over time.

To prepare for the stock redemption, the DOT Secretary would arrange, at Amtrak's expense, for a valuation of all assets and liabilities of Amtrak to be performed by the Secretary of the Treasury, or by a contractor selected by the Secretary of the Treasury. The valuation would be completed not later than 6 months after the beginning of Year One.

Retirement of Amtrak Preferred Stock; Transfer of Assets: Section 204 provides that, subsequent to the redemption of common stock, Amtrak would exchange its assets, including the Northeast Corridor, to the DOT Secretary in return for extinguishing the mortgage held by the United States on the Corridor and the cancellation of more than \$10 billion in accrued but unpaid dividends on preferred stock that Amtrak owes the United States. The United States would also surrender its preferred stock, in exchange for a nominal amount of common stock. Amtrak would remain liable for debt secured by the assets that is not held by the U.S., such as the mortgage on Pennsylvania Station in New York City. These debts would ultimately be assumed by the successors to Amtrak. At the time of transfer of assets to the United States, the DOT Secretary would enter into an agreement with Amtrak under which Amtrak would exercise on behalf of the Secretary care, custody and control of the assets transferred.

An element of the valuation and exchange process under section 203 and 204 would be to accomplish a detailed specification of the assets, personnel, and activities that support commuter authority operations in the Northeast Corridor and elsewhere. This would permit the uninterrupted continuation of commuter service in the event of other service disruption in the Amtrak system.

It is contemplated that, outside the Northeast Corridor, the DOT Secretary would consider the retransfer of certain real estate assets to appropriate state authorities, including Chicago Union Station and rail-related assets in the Chicago metropolitan area, and properties owned by Amtrak between Boston, Massachusetts and Washington, District of Columbia that constitute the route through Springfield, Massachusetts and the routes to Harrisburg, Pennsylvania and Albany, New York from the Northeast Corridor mainline.

Real Estate and Asset Sales: Section 205 mandates liquidation in the Year One-Year Three timeframe of the many properties held by Amtrak that are not integral to the provision of rail service and do not convey to successor entities. Any proceeds from the liquidation of assets under this section would be credited as an offsetting collection to the account that finances grants for debt and interest payments under section 206 of the bill to the Passenger Rail Service Provider.

Management and Transfer of Secured Debt: Section 206 sets forth a number of criteria for the future handling of Amtrak debt. First, except as approved by the DOT Secretary to refinance existing secured debt, Amtrak would not be allowed to enter into any obligation secured by assets of Amtrak after the date of enactment. Second, when the Passenger Rail Service Provider successor corporation is in place and it accepts the transfer of ownership of the existing rolling stock from Amtrak, all debt secured by the rolling stock would be transferred to and become a liability of the Passenger Rail Service Provider. An equivalent transfer of debt obligations would be made to the North East Corridor Compact

This section would also authorize such sums as may be necessary to the Secretary for grants to the Passenger Rail Service Provider and to the North East Corridor Compact to pay principal and interest payments on its secured debt for Years Two through Six.

Transition Operating Assistance: Section 207 sets forth the final operating assistance that would be provided by the federal government for intercity rail passenger service (other than the separate long-distance subsidies described above). Specifically, the section provides "such sums as may be necessary" for grants to Amtrak for operating expenses in Year One; grants to the Passenger Rail Service Provider for operating expenses of all services except long-distance trains and routes in Year Two; the administrative expenses of interstate compacts in Years One through Three; and grants in Years Two through Six to cover administrative expenses of the "holding company" Amtrak.

This section also provides that, after the last day of Year Two, the federal government would only enter into a grant agreement with a State, regional Compact, or other public entity.

### Title III-- Grants and Other Assistance for Intercity Passenger Rail Service

Capital Assistance For Intercity Passenger Rail Service: Section 301 adds a chapter 244 to title 49, United States Code, to set forth a permanent program for federal grant assistance to rail passenger operations for needed capital investments. The provisions of the chapter are closely modeled on the existing federal transit capital assistance program (49 U.S.C. 5309). The new program is intended to adopt the same stance as the current transit program, in leaving the management and operations of transit systems to appropriate government entities and restricting the federal role to up to a 50% share in the capital projects that qualify under planning and other criteria for federal assistance. As an interim measure, the federal share could be a higher percentage (up to 100 percent in the first year of the program (Year Two)). Up to an additional 30 percent of project net

capital cost could be funded from amounts appropriated to or made available to a department or agency of the Federal Government that are eligible to be expended for transportation.

Grants could be used for acquiring, constructing, supervising or inspecting equipment or a facility for use in intercity passenger rail service, expenses incidental to the acquisition or construction (including designing, engineering, location surveying, mapping, environmental studies, and acquiring rights-of-way), payments for the capital portions of rail trackage rights agreements, passenger rail-related intelligent transportation systems, highway-rail grade crossing improvements on routes used for intercity passenger rail service, relocation assistance, acquiring replacement housing sites, acquiring, constructing, relocating, and rehabilitating replacement housing, and rehabilitating, remanufacturing or overhauling rail rolling stock and facilities used primarily in intercity passenger rail service.

In addition to these purposes, the grant funding would be available to fund self-insured retention of risk for the first tier of liability insurance coverage for rail passenger service associated with the capital assistance grant, but the coverage may not exceed \$20 million per occurrence or \$20 million in aggregate per year. This option addresses the difficulty that replacement operators for Amtrak may have in obtaining "first dollar" liability insurance coverage.

Final Regulations on Applications by States for Corridor Development Grants: Section 302 provides that the Federal Railroad Administration must issue final implementing regulations for the new capital assistance program not later than June 1, 2006, so that the program can be available in Fiscal Year 2007.

Authority for Interstate Compacts for Corridor Development: Section 303 encourages the formation of interstate compacts (other than the NEC Compact, addressed separately) that can succeed to Amtrak as a regional operator of continued rail service. Formation of such entities, along with states that take on Amtrak service, is a necessary step in the restructuring process.
