Reference: EIR Comments and Recommendations for Central Valley Grade Separations

Gentlemen:

As a landowner adjacent to Santa Fe Way, we are fully supportive of the comments contained within the October 5, 2011 letter (attached) to you from the City of Shafter, City of Bakersfield Greater Bakersfield Separation of Grade District, and the County of Kern Roads Department.

BO162-1 | We understand that some of our property will be needed to accommodate the right of way acquisitions for the separations envisioned and described with the correspondence. We are willing to work with the agencies to determine the fair market value and acquisition of the lands necessary for these grade separations.

We look forward to working with your Agency.

Sincerely,

Bryan Batey

Re: Fresno to Bakersfield HSR Draft EIR/EIS - SCH 2009091126  
Riverdale Public Utility District Request for Extension of Comment Period

Dear Chairman and Members of the Board:

The Riverdale Public Utility District is located in south east Fresno County near the northern border of Kings County. The area is a thoroughly developed agricultural region with dense local and on-farm water infrastructure to support the dense agricultural development that has come into being over the last 130 years. The District Board of Directors and its staff has attempted in good faith to review the above DEIR/S. The document, however, is massive and consists of at least 17,000 pages when all its technical appendices are included. For many months prior to release of the DEIR/S the Authority provided little to no project details or answers. The typical pattern of the Authority's representatives was to decline to answer specific questions, but instead to refer affected parties and the public to await the release of the Project DEIR/S as all the answers would be provided in that document. The Authority and its representatives have not been forthcoming with project specific information or a specific proposal that is not subject to change throughout various meetings prior to the public release of the DEIR/S.

Our preliminary review indicates that the DEIR/S is not in compliance with State and Federal law and provisions established to protect to public and the environment. In addition, the Authority has failed to make available to the public all documents referenced in the DEIR/S. Due to the unwillingness of the Authority to provide timely and relevant project information, the District as well as other impacted parties of interest have had to simply rely upon reviewing the 17,000 pages of environmental documents to try to gain a clear understanding of this project proposal and means by which the Authority will mitigate potential impacts in Fresno and Kings County. The minimal

BO163-1

Submission BO163 (Ernest Mendes, Riverdale Public Utility District being represented (Atty. for), GLCDG, October 5, 2011) - Continued

OCT/05/2011/WED 09:58 AM Griswold Lasalle FAX No. 559 582 3106 P. 003

Board of Directors  
CALIFORNIA HIGH SPEED  
RAIL AUTHORITY  
October 3, 2011  
Page 2

review time of 45 days to consider all 17,000 pages<sup>1</sup> of the technical documents was extended by Authority staff an additional token 15 days.

BO163-2

However, this total 60 day time frame is a totally inadequate amount of time for the District and the public to conduct a thorough, meaningful review of the DEIR/S. Simply to read 17,000 pages in 60 days means reading the equivalent of reading a 280 page book every day for 60 days, and simultaneously be able to produce a meaningful critique of all that was read. These numbers show the absurdity of the 60 days review period offered by the Authority. In fact, the 60 day review period is meaningless and makes a mockery of the public education, public participation and due process goals of CEQA.

Clearly it is physically impossible for anyone to read the DEIR/S in the current 60 day review period, especially if that person must rely upon a paper copy available at the public libraries due to the library's limited hours of operation.

Therefore, in the public's interest, the District most strongly requests that the Fresno to Bakersfield Section EIR/EIS comment review period be extended to a minimum of six (6) months, through mid February 2012, to ensure that an adequate period of time is provided to the District and the public so that the public trust is upheld in protecting the public health, safety and welfare and the environment. Similar requests have been made by the California Farm Bureau Federation, the County of Kings other local land owners and communities that will be impacted, and the District hereby reinforces the need for and adequate DEIR/S comment review time as required by CEQA, the CEQA Guidelines, and by due process requirements.

Very truly yours,

RIVERDALE PUBLIC UTILITY DISTRICT

By:   
Ernest Mendes, President  
Board of Directors

<sup>1</sup>The Fresno-Bakersfield DEIR/S and technical appendices presented on the Authority's web site total approximately 17,000. The Authority also released the Merced to Fresno DEIR/S and those documents total a similar amount, meaning the public and impacted parties were given 45, and later 60, days to review 30,000 plus pages of environmental documents about the biggest public works project ever undertaken in the history of the San Joaquin Valley, if not of the State.

---

**BO163-1**

Refer to Standard Response FB-Response-GENERAL-07, FB-Response-GENERAL-27.

All references in the EIR/EIS are available in the administrative record.

As discussed in FB-Response-GENERAL-07, technical reports were prepared to record additional details on the environmental setting, impact assessment methodology, and environmental impacts for the following environmental disciplines: transportation, air quality, noise and vibration, biological resources and wetlands, geology, hazardous wastes, community impacts, relocations, aesthetics and visual resources, and cultural resources. Preparation of technical reports is not required by CEQA or NEPA. CEQA and NEPA do not require that these reports be distributed for public review with an EIR/EIS. However, all of the technical reports except the reports on cultural resources were posted on the Authority's website for public review at the same time as the Draft EIR/EIS and the Revised DEIR/Supplemental DEIS. The availability of these technical reports was included in the notices to agencies, elected officials, Native American tribes, organizations, individuals on the project's mailing list, and owners of land adjoining and near the alternative alignments.

The technical reports for cultural resources were not made available to the general public to protect those resources. Specific locations of wetlands and known populations of threatened and endangered species were also redacted from the biological resources and wetlands technical reports made available to the general public to protect those resources (e.g., Authority and FRA 2012f). The Authority and FRA provided the cultural resources technical reports and redacted biological and wetlands information to experts in the fields of historic architecture, archaeology, and biology on their request.

**BO163-2**

Refer to Standard Response FB-Response-GENERAL-07.

Submission BO164 (Cindy Renick, Rock N Ranch Rascals Daycare, October 13, 2011)

BO164-1

October 10, 2011

California High-Speed Train  
Fresno to Bakersfield DEIR/EIS Comment  
770 L Street, Suite 800  
Sacramento, CA 95814

BO164-1

Thank you for the opportunity to comment on the High Speed Rail (HSR) project and express my **opposition** to this project. In 2008, California voters approved a bond measure to finance construction of the High Speed Rail (HSR) system. Then there was little information available to most of us regarding this project. I am not sure how many California voters at that time could really grasp the total billions of dollars that it will take to complete this project.

I am a resident in Bakersfield, California and through the HSR may be a brilliant idea somewhere in the future, **I do not agree with it at this time**. I am concerned about the proposed routes that are being considered through the City of Bakersfield. It will tear right through the City displacing many residents, businesses, churches, and schools. Those that are not directly affected by loosing their property to this project, but are close by the project will loose valuable property value that is already below where it should be due to the current economy.

The routes that are proposed will affect our neighborhoods across Bakersfield:

- 282 businesses will be forced to close their doors and relocate.
- 527 homes and apartments will be demolished.
- Several Schools and a Daycare will be affected.
- Numerous Churches some of which had to save for years to purchase their property and build a church of their dreams will be demolished and some may or may not be able to rebuild.

If consideration of the environmental and community impacts of the high-speed train system is important in determining the location of the tracks and train stations, it should stand to reason that going around the outskirts of a City is more cost effective and beneficial then it is to rip through the middle of a City. My suggestion is that a second look at the location of the train station in Bakersfield be looked at before making the final decisions on the routes. There has been numerous meetings held and there have been some very good suggestions as to other locations for the Bakersfield train station. I would like to remind you that the final HSR route has not been decided on and that now is the time to reconsider making the appropriate changes.

I am in hopes that this route can be changed to avoid running directly through our City not only to benefit the citizens of Bakersfield, but also protect my future too. Because I am one of the residents and business owners that the current routes will either go directly over my property or beside it. I own and operate Rock N Ranch Rascals Daycare located at 10119 Palm Avenue in Bakersfield. In either case I would have to relocate my business, even if the HSR runs beside my property, I care for 6 week to 5 year old children and beside a structure like this is no place to have infants and toddlers.

Four years ago my husband and I looked for over a year to find the perfect home. One that was set up to meet all of our needs, from the layout of the house which would accommodate my business when the time was right, to the 3 stall horse barn and hay storage area out back and the large section of the back property that has eense been turned into a lighted arena for my 4-H girls to ride and practice in, and the cross fencing to accommodate the children in the daycare and separate them from the animals out back. We found our home and we put everything into it to make it perfect for us and my goals for the business.

- We landscaped the front yard and put an iron fence around the front.
- We put in an automatic security gate at the driveway entrance to make the property saver.
- We put in a lighted arena and added three more pens with covers for the horses.
- And like a lot of my neighbors invested our nest egg into our home, business and future.

Then I quit a job that I had been at for 18 years to own and operate my own business. We had finally got to where we believed we should be at this point in our life and now because of some State wide project and an incomplete Environmental Impact Report we stand to loose it all, our home and to relocate a business that will have downtime due to getting relicensed at a new location. And then will I be able to find all of the amenities that my property has and still be in an area that will work for my parents and children or will I be starting all over with my business. Here I feel like I have so much to offer the children in my care from a safe and fun environment to a little bit of country where they can learn and grow.

So yes I am opposed to the current routes being considered not only personally but from the stand point of the other citizens of Bakersfield who also have a lot to loose. It is not in the best interest of a City to disrupt this many home owners, businesses, churches and schools in a community when an alternate route would be less evasive to the community. I would be willing to drive the extra twenty minutes to a train station to help maintain my City more of the way it is now not with a high-speed train running through it.

Sincerely

Cindy Renick

Submission BO165 (Keith Gardiner, Rosedale Ranch, October 11, 2011)

October 07, 2011

Mr. Tom Tracy  
Mr. Jeff Abercrombie  
Mr. John Popoff  
California High-Speed Rail Authority  
770 L Street, Suite 800  
Sacramento, Ca. 95814

Reference: EIR Comments and Recommendations for Central Valley Grade Separations

Dear Messrs:

As Landowners of the Rosedale Ranch Master planned communities which are adjacent to Santa Fe Way within the city limits of Bakersfield, we are supportive of the comments contained within the October 5, 2011 correspondence written to you from the City of Bakersfield, City of Shafter, Greater Bakersfield Separation of Grade District, and the County of Kern Road Department.

BO165-1

We understand some of our lands may be needed to accommodate the grade separations envisioned and described in the correspondence. We are willing to work with the agencies to determine fair market value and acquisition of these lands necessary for these grade separations.

As landowners in the region we have worked diligently to promote consensus and cooperation within our communities to ensure the goals of the California High-Speed Project leave a positive impact on our local community.

Sincerely,

Keith Gardiner
